6. Mrudula Gotmare (D20A)

Mentors :

Dr. Rohini Temkar(Assistant Professor CMPN)

Dr. Sujata Khedkar, Associate Professor, CMPN

Problem Statement Description:

This project presents an innovative AI-based chatbot solution for the Department of Justice (DoJ) website. The interactive virtual assistant leverages advanced Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), and Large Language Models (LLMs) to enhance accessibility to legal information. Designed to address the limitations of existing systems, the chatbot delivers multilingual support across 14+ Indian languages, multimodal query handling (text, image, and audio), and user-friendly interaction through features like "Chat with PDF" and relevance feedback.

The proposed solution emphasizes security and scalability, utilizing AES-256 encryption for sensitive data and MongoDB GridFS for efficient file storage. It integrates a token-based authentication system (JWT) to ensure secure access. Administrators benefit from demographic insights and targeted analytics, fostering informed decision-making. Additionally, compliance with GDPR regulations reinforces user trust.

Performance is enhanced by contextual data handling, dynamic query updating, and potential reinforcement learning applications. This chatbot aims to democratize legal information, reduce dependency on costly consultations, and empower users to address legal queries independently. Future improvements include dynamic database updates, real-time demographic analytics, and reinforcement learning for adaptive enhancements, ensuring continued relevance and efficiency in addressing diverse legal needs.
