ODD-SEM EVENTS

NODE.JS WORKSHOP

Introduction: Every year IEEE-VESIT conducts various technical workshops covering various domains. The Node.js workshop marked the beginning of the chain of these technical and exciting workshops.

Concept: The Workshop was conducted on the 22nd of November, 2020 in the form of two sessions, the platform being Google Meet. The first session began at 9:00 AM and concluded at 11:00 AM. The second session began at noon and concluded at 1:30 PM. The participants were taught how to make a chat app using node.js and socket.io that could maintain different chat rooms and allow conversation between people.

Modus Operandi:

Session 1:

The participants were required to install Node.js and Visual Studio Code on their machines before the workshop. The workshop commenced with an explanation about the basics of HTML and CSS by Vaishnavi Ainapure (EXECOM-D12A) and Abhijeet Thihekar (Treasurer-D12A), who taught the participants how to create the front-end of the application by conducting an interactive programming session. Geet Ramchandani (EXECOM-D10) took the session further by explaining to the participants about node.js, socket.io, and their applications. This was followed by a short code-along session to design the backend of the application. Any doubts regarding the first session were cleared in the break.

Session 2:

The second session began with Mr. Geet Ramchandani continuing the code-along session and setting the basic frame of the server. Mr. Aditya Mohan took over and worked towards making the application capable of transferring messages. He taught the participants how to make different groups, how to transfer data to and from the server, and also displaying it. This was followed by an interactive quiz on Kahoot. Thus, the participants learned how to make an interesting web-based chat app. All the doubts were cleared after the session.

Kahoot Quiz winners:

Position	Participant Name	Division
1	Aniket Dewnani	D7B
2	Neeharika Nagori	D7A
3	Darshan Khot	MCA 3A

Dr. Ganesh Bhatia

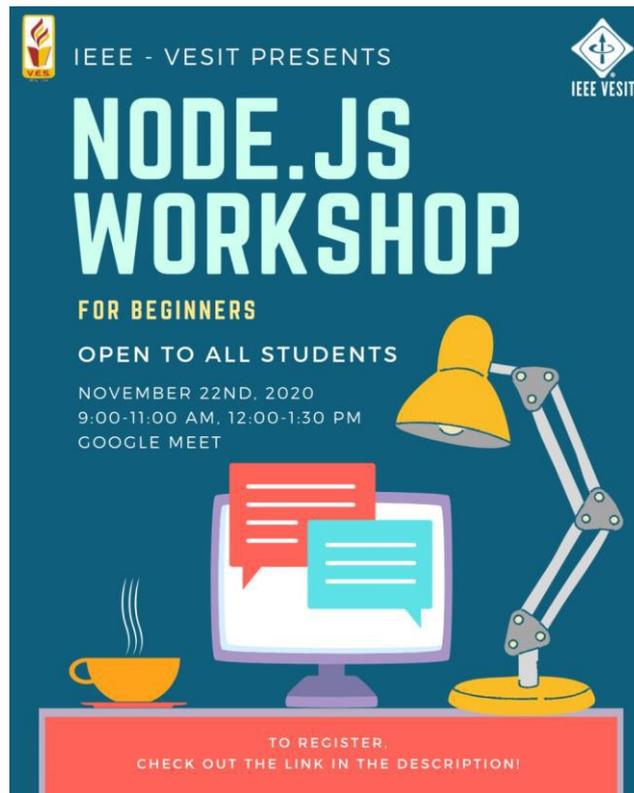

Participation: Around 75 students participated in the workshop, making this a successful event indeed. It was a perfect blend of technicality and eagerness for creation which drew in more people.

Attendance record: Final attendance record, taken at 1:30 PM, stands at 37.

CYBER SECURITY WEBINAR

Introduction: The Cyber Security webinar was the beginning of IEEE-VESIT's partnership with ICFAI Business School.

Concept: The Workshop was conducted on December 2, 2020, the platform being Zoom. The session began at 11:30 AM and concluded at 1:00 PM. The participants gained knowledge and information about the basics of Cyber Security including various Cyber Laws and Malwares.

Modus Operandi:

Dr. Vanita Joshi, faculty at ICFAI Business school, started the webinar by interacting with the participants and by asking them about their understanding of Cyber Security. This was followed by an explanation about different types of malware and system vulnerabilities caused by snooping, intrusions, and cyber vandalism. Dr. Vanita Joshi explained more about crimes such as identity theft, phishing, click fraud, and cyber-terrorism. Loss of revenue, lowered market value, legal liability, and many other points were discussed which gave the participants an idea about how cyber-crimes and cyber-attacks affect businesses. Dr. Vanita Joshi also explained recent cyber-attacks through examples like Cosmos Bank (Pune) case study, Canara Bank case study, breach of 1.1 billion records of Indian Aadhar cardholders to name a few. This was followed by an explanation about how these things could be prevented using strong passwords, firewall, encryption, multi-factor authentication, etc. were discussed. After the explanation, all the doubts of participants were cleared during the Q&A session.

Participation:

The webinar was attended by 72 people who gained information about cybersecurity in detail.

Attendance:

The final attendance report stands at 39 participants, taken at the end of the webinar.

The screenshot shows a Zoom meeting interface. At the top, it says 'You are viewing Dr. Vanita Joshi's screen' and 'View Options'. The main content is a slide titled 'System Vulnerability and Abuse'. The slide has two main bullet points: 'Security' and 'Controls'. The 'Security' point lists 'Policies, procedures and technical measures used to prevent unauthorized access, alteration, theft, or physical damage to information systems'. The 'Controls' point lists 'Methods, policies, and organizational procedures that ensure safety of organization's assets; accuracy and reliability of its records; and operational adherence to management standards'. On the right side of the Zoom window, there is a vertical list of participants: 'T' (Tejas Dhopavkar), 'Dr. Vanita Joshi' (with a video thumbnail), 'Rahul Tiwari', 'M' (IBS Mumbai), and 'Ashutosh Pandey'. At the bottom of the Zoom window, there are controls for 'Unmute', 'Start Video', 'Participants' (72), 'Chat', 'Share Screen', 'Record', and a 'Leave' button. The slide footer includes 'Cyber Security', '02-12-2020', and the number '3'.

System Vulnerability and Abuse

- **Security**
 - Policies, procedures and technical measures used to prevent unauthorized access, alteration, theft, or physical damage to information systems
- **Controls**
 - Methods, policies, and organizational procedures that ensure safety of organization's assets; accuracy and reliability of its records; and operational adherence to management standards

Zoom Meeting

Some Important Facts

- The detection of pandemic-related **cyber attacks** grew by a massive 605% in Q2 2020.
- **Cyber threat detection** in Science and Technology has increased by 91%.
- **Attacks on cloud services** users reached nearly 7.5 million in the second quarter of 2020
- **Publicly disclosed security incidents** increased by 22% in Q2 2020, out of which:
 - 35% were **malware** attacks
 - 17% were account **hijacking**, and
 - 9% were **targeted attacks**
- **Mobile malware** spiked 15% due to the surge in the use of Android Mobby Adware.
- A significant rise of 103% has been reported in **Microsoft Office Malware**.

EVEN-SEM EVENTS

ANDROID WORKSHOP USING REACT NATIVE

Introduction: Every year, IEEE-VESIT conducts numerous technical workshops covering various domains. The Android workshop using React Native marked the beginning of the chain of these technical and compelling workshops. The workshop was conducted by Abhijit Thikekar (Treasurer-D12A), Omkar Mane (EXECOM-D12A) and Dinesh Kannan (Jr. Web Editor-D12C).

Concept: The Workshop was divided into two sessions, the first session was conducted on the 30th of January 2021 at 3:30 pm, followed by the next on the 31st of January, 2021 at 3:00 pm. The platform being Google Meet, the participants were taught how to develop a food delivery application using React Native.

Modus Operandi:

Session 1:

The participants were required to set up a development environment for React Native and install Visual Studio Code. The workshop commenced with an explanation of the basics of React Native, by Abhijit Thikekar, which was followed by Dinesh Kannan and Omkar Mane explaining the participants about how to create multiple screens, the layout of the app and implementing basic functionalities like incrementing the total cost if a food item was bought by the user and so on. Omkar Mane gave a diagrammatic explanation about the internal layout of views, buttons and text which made it easy for the participants to understand the code. The doubts were efficiently cleared by making a separate doubt forum for the participants, leading to an uninterrupted programming session.

Session 2: The second session was conducted by Omkar Mane, by continuing with the code-along session and helping the participants to set-up the application about receiving the orders. Every food delivery app has a system to track orders which is implemented with the help of maps. Abhijit Thikekar taught the participants how to implement this functionality by integrating Google Maps API in the application. Eventually, the participants learned how to make an interesting Android Food Delivery App, followed by an interactive doubt session.

Participation: 51 students participated in the workshop, making this a successful event indeed. It was a perfect blend of technicality and an eagerness for creation which drew in more people.

UI/UX WORKSHOP AND COMPETITION

Introduction:

The UI/UX workshop was the first event conducted by the Women in Engineering section of IEEE-VESIT for the academic year 2020-21.

Concept:

The Workshop was conducted on the 6th of February, 2021, on the platform, Google Meet. The workshop started at 11:00 am and concluded at 1:30 pm. The participants learnt how to design a website interface on the designing tool, Figma. The participants designed 2 screens of a website “woment” and prototyped it. “woment” is a female-centric website curated for women, by women. It has courses taken by women instructors, a women-discussion forum, and more. The workshop was followed by a designing competition, that required the participants to design 2 or more screens and winners were decided later. The competition Submission was on the 11th of February, 2021.

Modus Operandi:

Workshop:

This workshop required the participants to sign up on a designing platform called Figma. The workshop took off with an introduction of our instructors by Ayesha Gulrajani (WiE-D20). The workshop then moved ahead to address what the website “woment” represented, the idea behind it and the different screens and tabs of the website were explained and discussed by Madhumita Menon (WiE-D14B).

Ms. Saumya Kulkarni (Sr. TAB-D19B) introduced the participants to UX in a fun and interactive way followed by designing wireframes for 2 screens for a Women in Tech website taken by both Ms Mansi Kasar (Editor-D14B) and Ms Saumya Kulkarni.

The competition details were disclosed at the end of the workshop and a deadline of 11th February was given.

Competition:

The UI/UX competition had a deadline of 11th February, 2021. The contestants had to design 2 or more screens of any website and submit it through a Google Form. The designs were judged on the basis of usability, consistency, overall aesthetics and innovation.

Winners of the competition:

The 1st place was shared by Sristi Kushwaha from D14B and Vignesh Poojary from D9A. The runner up position was bagged by Nidhi Nair from D8 followed by Ryan Rodricks from D10A as the second runner up.

Participants:

There were 105 participants for the workshop and the competition saw 20 entries.

Notice:

IEEE-VESIT's Women in Engineering section's UI&UX Competition

Design 2 or more Screens of the same website
taught in the workshop with a different color palette
OR
Design 2 or more screens of your own website idea

**Judging Criteria: Usability, Consistency, Overall
Aesthetics, Innovation**

Rules:

- 1. Participants should use Figma only.
- 2. Participants have to submit the Figma view link on the Google Form provided to them after the workshop.

Date of Submission:
11th February, 11:59 pm
Platform: Google Forms

Images:

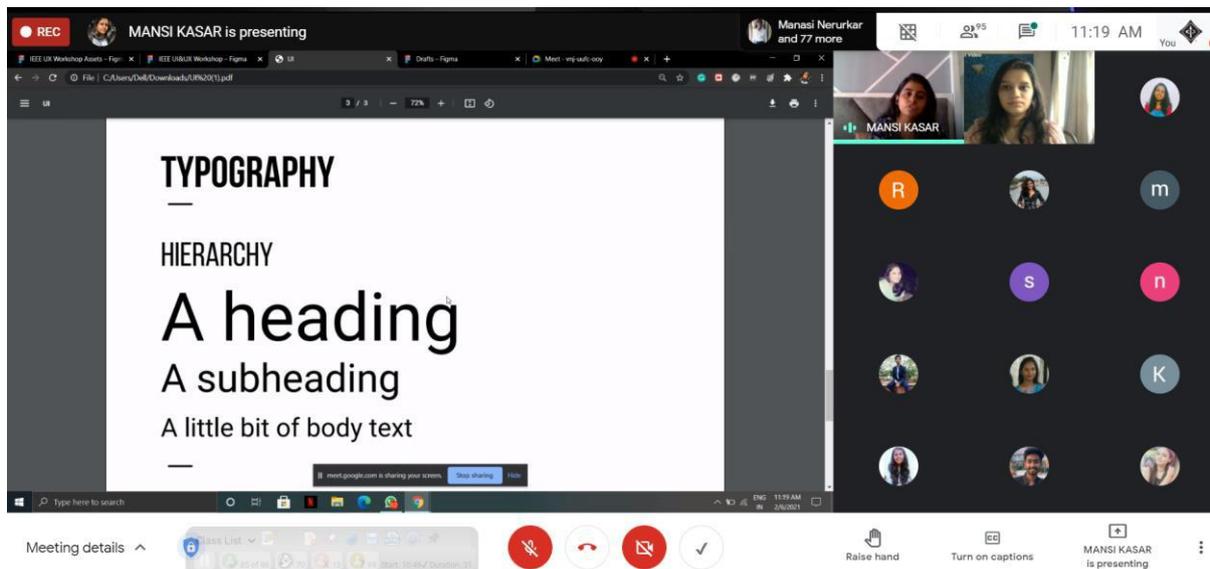

Image 1: Participants being taught about readable font styles and font sizes

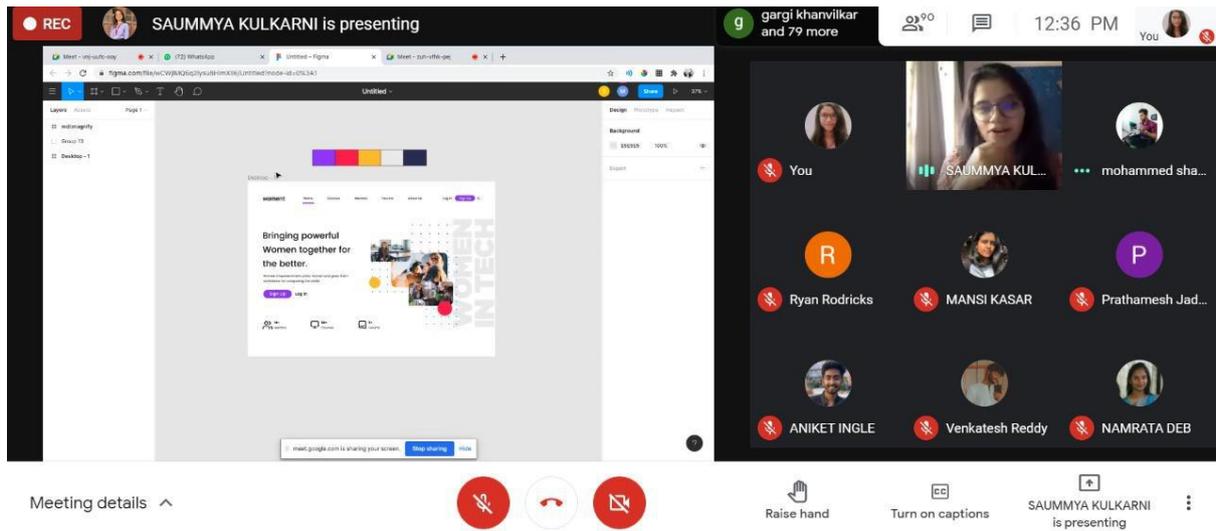

Image 2: Participants being taught to design the UI of a website

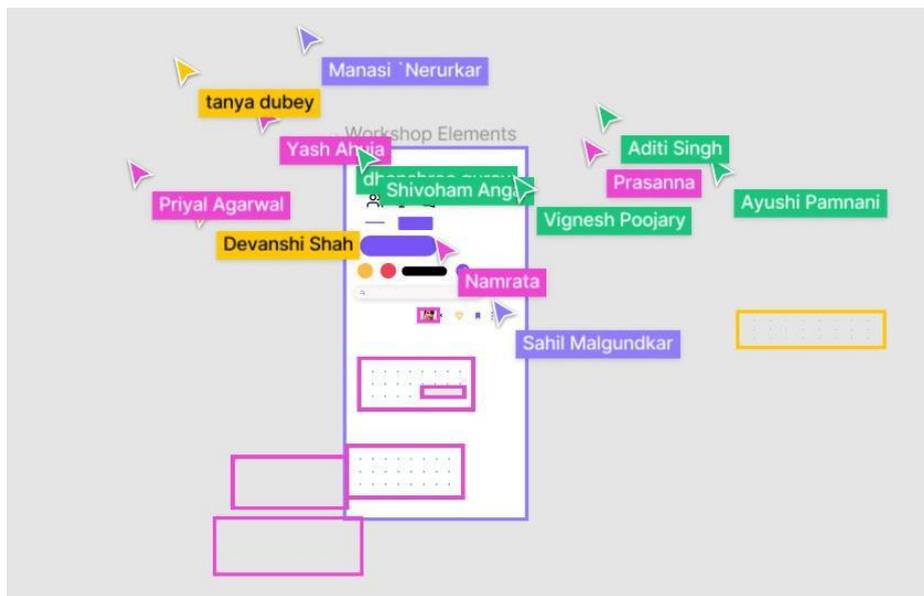

Image 3: Participants taking reference elements from the Figma file

Winners of UI/UX competition:

The graphic features a central illustration of a smiling man in a white shirt with blue stripes on the sleeves, holding a golden trophy. The background is teal with confetti and stars. Logos for VCS and IEEE VESIT are in the top corners. The text 'UI/UX COMPETITION WINNERS' is prominently displayed in the center. Below, three columns list the winners by rank: 2nd Place (Nidhi Nair), 1st Place (Srishti Kushwaha and Vignesh Poojary), and 3rd Place (Ryan Rodricks).

2ND PLACE	1ST PLACE	3RD PLACE
Nidhi Nair (D8)	Srishti Kushwaha (D14B)	Ryan Rodricks (D10A)
	Vignesh Poojary (D9A)	

BLOCKCHAIN WORKSHOP

Introduction: Every year, IEEE-VESIT conducts numerous technical workshops covering various domains. The Blockchain workshop was conducted in order to give the participants, overview of this in-demand technology, with the help of a hands-on project. The workshop was conducted by Alisha Punwani (Sr. Web Editor – D17C) and Abhinav Sharma (Executive Officer - D12A).

Concept: The Workshop was divided into two sessions; the first session was conducted from 11:00 AM to 12:30 PM while the second session was conducted from 1:00 PM to 2:30 PM. The platform being Google Meet, the participants were taught how to develop a voting application with the help of blockchain, solidity and Ethereum.

Modus Operandi:

Session1:

The first session saw the participants gain information about the basics of Blockchain, the comparison of blockchain with an ordinary ledger, and how blockchain is different from the ordinary database. Some important keywords like immutability, decentralized, and distributed trust were also explained to the participants. This was followed by an explanation about the features of blockchain, like security, faster settlement, distributed ledger, and so on. The current scenario along with the real-world applications and the future scope of blockchain was also discussed. Solidity is an object-oriented programming language that is used to write smart contracts. Smart contracts play an important role in the blockchain. Keeping this in mind, the participants were taught what are smart contracts and how data is written in a block. Later, the smart contracts were deployed using Truffle, an open-source framework for Dapp Development and smart contract life cycle management.

Session 2:

The second session began with the participants gaining information about the basic syntax of solidity functions, which play an important role in developing any Dapp application. Having learnt the basics, the participants were encouraged to develop an election system in a hands-on coding session. Using JavaScript and Solidity, the participants developed an election system guided by the instructors. Truffle framework was used to compile the Solidity code and writing data to the blockchain. The participants were then introduced to Ganache, a tool which provides Ethereum crypto-currency for performing transactions on Ethereum Blockchain and Metamask a chrome extension that allows us to connect to a Blockchain. In this way, the participants were able to create a real-time, dynamic election system. This was followed by a doubt clearance session, where all the doubts of the participants were cleared.

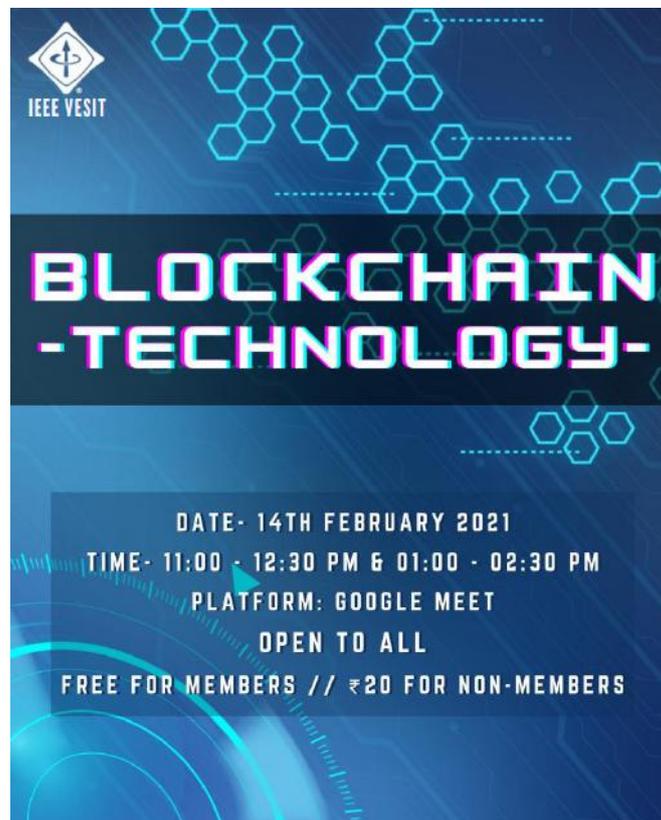

Participation: 61 students participated in the workshop, making this a successful event indeed. It was a perfect blend of technicality and an eagerness for creation which drew in more people.

ONLINE TREASURE HUNT

Introduction:

Every year, IEEE-VESIT conducts numerous technical workshops and events covering various domains. The Online Treasure Hunt, known to be one of the biggest events of IEEE-VESIT was administered by the council with full enthusiasm followed by maximum participation from students from all branches and societies.

Concept:

The Online Treasure Hunt was a 24-hour event, starting from 20th February 2021 at 8 pm, the event was concluded on 21st February 2021 at 8 pm. The event basically was an online quiz competition where the participants were taken through an astounding storyline drafted by the council. The participants were first challenged by a set of aptitude questions. After they clear this first stage, the event was then bifurcated into two majors namely COMPS/IT & EXTC/ETRX/INST (the questions were asked accordingly). The questions were designed in such a way that the participants could not get the desired answer by accessing any of the resources such as the internet or books, which made the questions more rigorous.

Modus Operandi:

Day 1: The event started on 20th February 2021 at 8 pm. The website was accessible through all devices (mobile/ laptop/tablets) and supported all browsers. The event was free for the members as well as the non - members of the council. The questions being challenging, supported by its amazing storyline, the event crossed around 140+ participants on the first day itself. The image below depicts a glimpse of the website.

Day 2: The event was continued the next day viz. on 21st February 2021 as there was no break in between the participants were free to log in, anytime they want on the website. Due to the overwhelming participation showed at the event with 230+ participants, the event timing was postponed from 4 pm to 8 pm. Finally, there were 6 students (3 from each domain) who cleared it with the highest credentials. The winners were as follows:

CMPN/IT	EXTC/ETRX/INST
Praneel Rastogi	Arnab Saha
Shalaka Waghmare	Sahil Salian
Ninad Rao	Sristi Kushwaha

Participation: Around 231 students participated in the event, making it yet another success. This event not only increased the knowledge of the participants but also enhanced critical thinking and deep knowledge of various concepts.

Shalaka Waghmare DI ₁₀	Sahil Salian DI ₄ B
Ninad Rao DI ₁₀	Sristi Kushwaha DI ₄ B

ESSAY WRITING COMPETITION

Introduction: The Essay Writing Competition was held by the Women in Engineering section of IEEE-VESIT for the academic year 2020-21, during International Women's week.

Concept: The competition was announced on the 24th of February, 2021 and the submissions were accepted till the 4th of March, 2021. The participants had to compose an essay of around 700 words, about the changes that they'll bring about in their workplace or educational institute, assuming they held any position in the organization.

Modus Operandi:

The competition saw participants highlighting key issues faced by women on the daily basis. The participants brought about concrete ideas as solutions to each of the problems. The entries were accepted through google forms in pdf format and the last date of submission was 4th March. The competition had 12 participants, out of which 3 best essays were hand-picked. The result was announced on International Women's Day, i.e., on the 8th of March.

Result

The 1st place was bagged by Mallika Kulkarni from D14B. The runner up position was shared by Yash Mate from D17B and Arnab Saha from D14B, followed by Nidhi Nair from D8 as the second runner up.

MACHINE LEARNING WORKSHOP

Introduction: Every year, IEEE-VESIT conducts numerous technical workshops covering various domains. The Machine Learning Workshop was conducted by the members of the council of IEEE-VESIT in collaboration with CSI-VESIT.

Concept: This workshop was divided into four days of four sessions respectively. The dates of the workshop were 20th March 2021, 21st March 2021, 27th March 2021 and 28th March 2021 with the timings being 11:00 AM to 1:00 PM. The platform being Google Meet, the participants were taught basic libraries like Pandas and NumPy, supervised and unsupervised learning along with basics of Artificial Neural Networks, it's implementations and applications.

Modus Operandi:

Day-1:

The workshop was commenced by Saurav Telge (Operations Secretary – CSI-VESIT) who covered the introduction to Machine Learning and various libraries used for Machine Learning. He discussed the difference between Artificial Intelligence, Machine Learning, and Deep Learning, it's job prospects and list of libraries such as NumPy, Pandas and Matplotlib. The workshop was further continued by Abhijit Thikekar (Treasurer - IEEE-VESIT) where he discussed the fundamentals of Linear Regression, it's logic and math, functions, implementation and outcomes. The participants were taught the implementation of Linear Regression along with all the fundamental concepts like data pre-processing, splitting the dataset into training and testing, training the model and finally testing its accuracy to make predictions on the House Price Prediction dataset.

Day-2:

The next session was taken over by Tejas Dhopavkar (Secretary - IEEE-VESIT) where he covered the fundamentals of Logistic Regression, some basic mathematical concepts and equations used for its implementation. The participants were given a hands-on coding experience by implementing Logistic Regression to classify tumors as benign or malignant, using the sklearn library. The session continued with the explanation about Hyperparameters Tuning, its importance in Machine Learning and its implementations by Saurav Telge (Operations Secretary – CSI-VESIT). The coding as well as doubt solving was done simultaneously with the participants.

Day-3:

The Day3 workshop was conducted by Tanishqa Shetty (Chairperson - IEEE-VESIT) where she discussed the fundamentals of K-Nearest Neighbors Algorithm, its implementation and applications, the libraries required, the need of those algorithms, basic mathematical theorems, equations and distance functions. She demonstrated the K-nearest Neighbors algorithm by implementing the Iris Flower Dataset, visualizing

the model, training and testing it to high accuracy as well as plotting the data. The coding as well as doubt solving was done simultaneously with the participants.

Day4:

The last day of the workshop was conducted by Aishwarya Sahoo of CSI-VESIT, covering the fundamentals of Artificial Neural Networks, its implementation and applications. She discussed the various activation functions of ANN, mathematical concepts related to it and also the applications of TensorFlow and Keras.

Participation:

125+ students participated in the workshop, making this a successful event indeed. It was a perfect blend of technicality and an eagerness for creation which drew in more people.

Attendance Record:

IEEE VESIT IN COLLABORATION WITH CSI VESIT PRESENTS

MACHINE LEARNING WORKSHOP

TOPICS TO BE COVERED:

- Linear Regression
- Logistic Regression
- K Nearest Neighbours
- and many more..

DATE : 20TH , 21ST , 27TH , 28TH MARCH
TIME : 11AM - 1PM

EXCLUSIVELY FOR CSI AND IEEE VESIT MEMBERS

Images:

Image 1: Participants being taught different types of machine learning

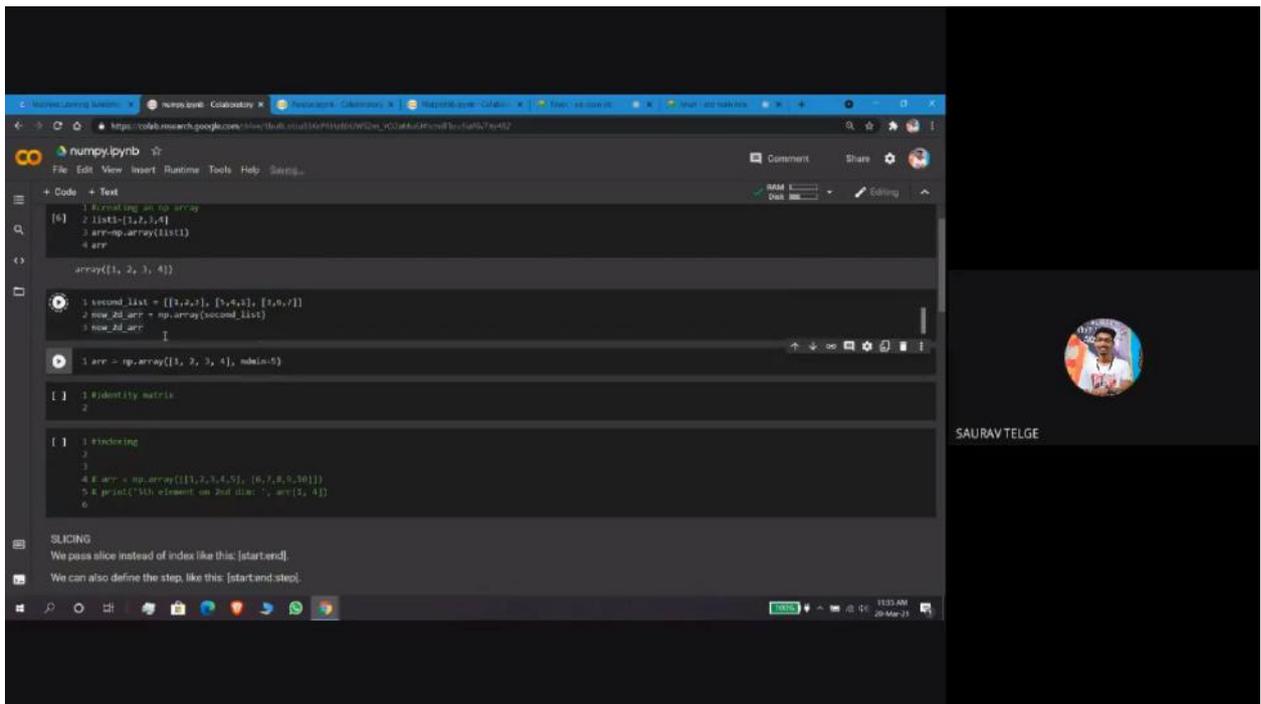

Image 2: Participants being taught the NumPy library

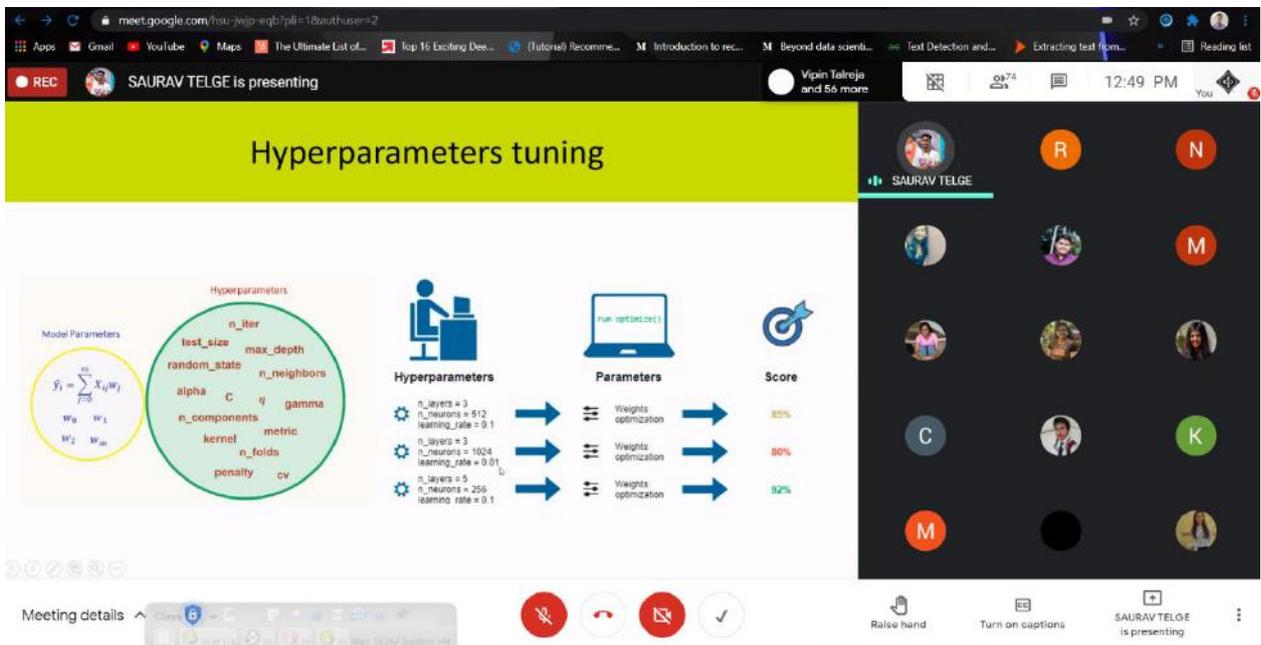

Image 3: Participants being taught hyper-parameter tuning

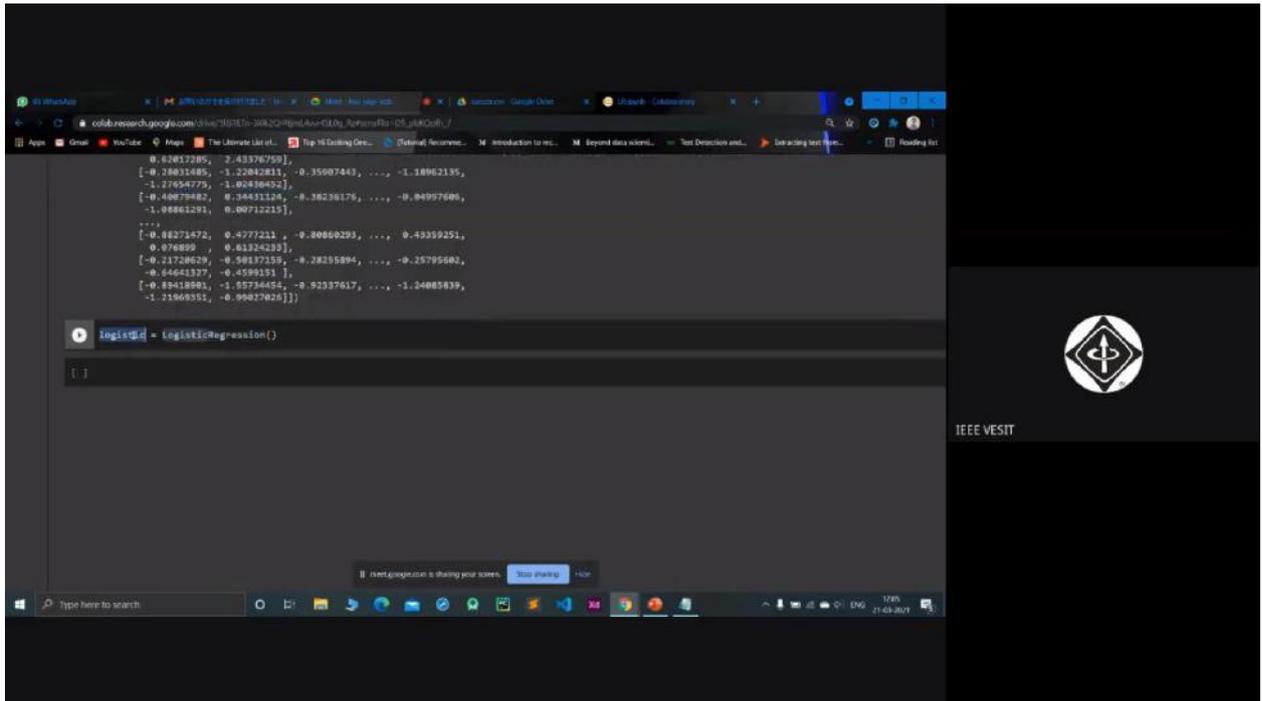

Image 4: Participants being taught implementation of Logistic Regression

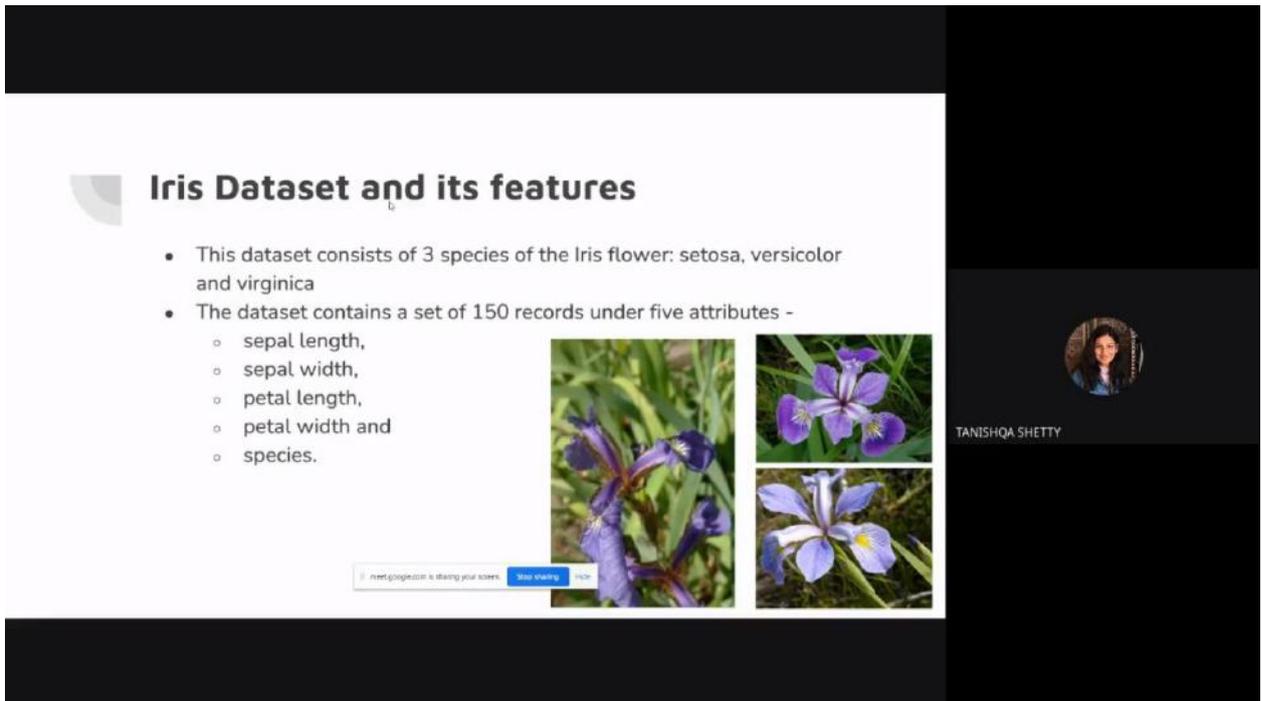

Image 5: Unsupervised Learning Session in progress

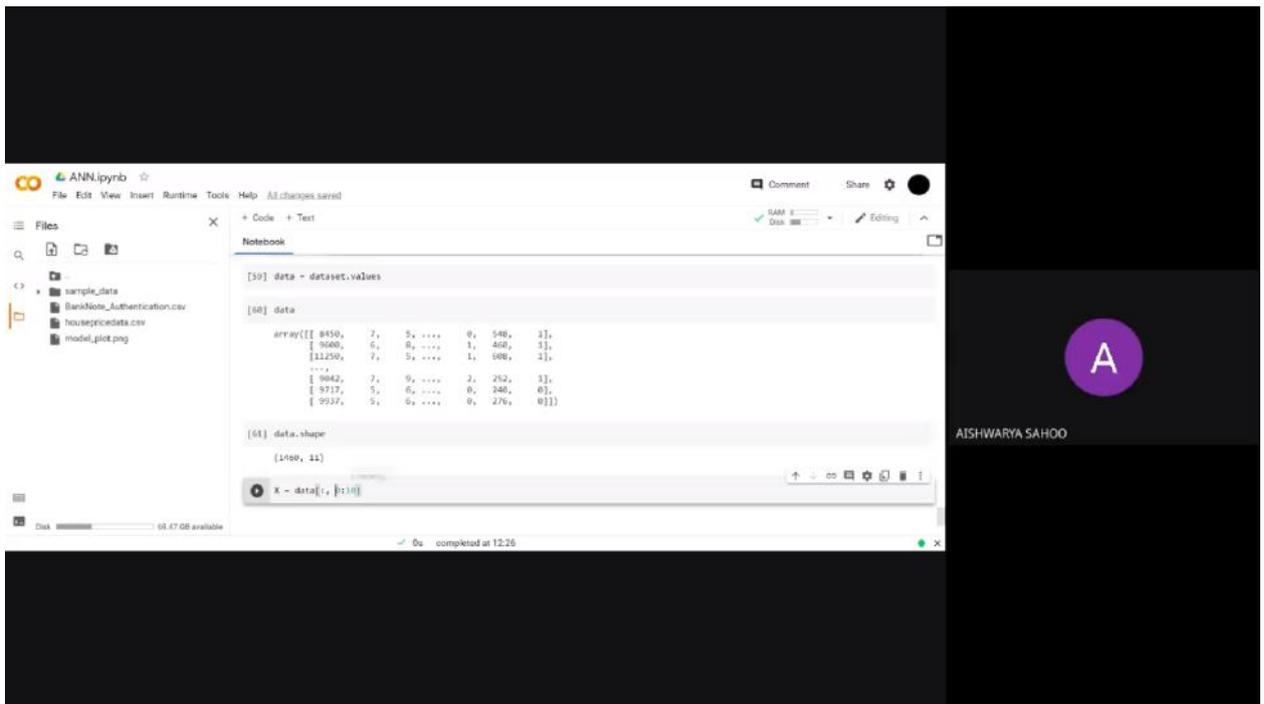

Image 6: Participants being taught the implementation of Artificial Neural Networks

CLOUD COMPUTING WORKSHOP

Introduction:

Every year, IEEE-VESIT conducts numerous technical workshops covering various domains. The Cloud Computing workshop was conducted in order to give the participants, overview of this in-demand technology, with the help of a hands-on project. The workshop was conducted by Alisha Punwani (Sr. Web Editor – D17C), Omkar Mane (EXECOM-D12A) and Dinesh Kannan (Jr. Web Editor - D12C).

Concept: The workshop was conducted on 4th April, 2021. The timings of the workshop were 11:00 AM to 2:00 PM. The platform being Google Meet, the participants were taught the basics of cloud computing, its working, advantages and disadvantages, its future scope along with its implementation on Qwiklabs and Amazon Web Services.

Modus Operandi:

The session was initiated by Omkar Mane, who gave the participants an introduction about Cloud Computing and its origins, its different types along with its architecture, different platforms available for use. The advantages and disadvantages of different platforms like Amazon Web Services (AWS), Google Cloud Platform (GCP) and son were discussed along with how and when to use them.

In order to give the participants a hands-on experience, Qwiklabs was chosen as an ideal learning platform. After the participants had created their account on Qwiklabs, they were directed to start their first lab, which was conducted by Alisha Punwani. The lab taught the participants about the cloud shell and Google Cloud Platform. The participants executed various commands in the cloud shell which gave them a complete idea about the basics of cloud computing.

The second lab was based on a real-life scenario. The participants had to host their own website on the cloud, an integral skill in today's industry. Following the instructions of Dinesh Kannan, the participants first created a sample website on WordPress and then configured it to Amazon EC2. An amazon S3 bucket was created by all the participants with static website hosting enabled. As soon as this was done, the participants generated their static websites on WordPress. After this step, the participants were instructed on how to upload the WordPress static website on Amazon S3 bucket. Lastly, the participants created scripts to make changes in the hosted website.

Thus, the participants learnt about Cloud Computing in theory and in practice.

Participation: The workshop was attended by 57 participants who gained knowledge about cloud computing

TECHNICAL PAPER PRESENTATION

Introduction:

Every year, IEEE-VESIT conducts numerous technical workshops and events covering various domains. The Technical Paper Presentation seminar was organized by the council to highlight the importance of technical and research paper in one's academic and professional life.

Concept:

The Technical Paper Presentation seminar was conducted on 10th April, 2021 from 11:00 AM to 12:30 PM. The seminar, which was conducted on Google Meet, taught the participants, the importance of technical papers, how to systematically search for them along with techniques to quickly gauge the underlying concept of the research paper. The speaker for the seminar was Mrs. Priya R.L, faculty member at the Computer Engineering department.

Modus Operandi:

The seminar started with Mrs. Priya R.L giving an introduction about research papers and their importance in the academic and professional life of the students. The highlight of the introduction was the point that a good research paper is a combination of technical knowledge and excellent writing skills. The session progressed with the explanation about various journals, their ranking, selecting the right journal for publication and information about various conferences. Tools for writing a research paper like Overleaf, Latex, MS Word were also discussed. Steps for writing a technical or a research paper were the highlight of the remaining session.

Mrs. Priya R.L explained the IEEE format of research paper and gave techniques for writing a good abstract and introduction. This was followed by the steps for doing a literature survey. Cite as you write was the point made during the explanation about literature survey. Explanation about the methodology section was given next. During the course of this explanation, the importance of easy to understand, clear diagrams and figures was also explained. Mrs. Priya R.L also highlighted the importance of rough documentation to keep record of the work done. Rough documentation and notes help in writing the methodology in a clear, concise manner. As every system has a scope of improvement, these improvements were to be mentioned in the dedicated section of future works. The explanation about the conclusion of the paper was given next. It included points like giving a proper summary of the methodology and not adding any new points. The importance of the references section was highlighted next. The format of citations for giving due credit to the original work was also discussed.

Later, Mrs. Priya R.L instructed the students about the Do's and Don'ts of writing a research paper. This included points like plagiarism, originality of work, identifying predatory journals and so on. The seminar concluded with the question-and-answer session.

Participation: 105 students participated in the event, making it yet another successful event.

CASE CLOSED

Introduction:

IEEE-VESIT conducts many events as a part of Praxis, the annual technical festival of VESIT. This academic year during e-Praxis, IEEE-VESIT conducted Case Closed, one of its most popular events in the online mode.

Concept:

Case Closed was conducted on 21st April, 2021 from 3:30 PM to 6:30 PM. The platform for the event was Gather.town, an online platform which is free to use. The event is based on the movie, "The Matrix", and uses some ideas for the movie for comic relief as players navigate through the maze trying to solve the technical questions posed by their adversaries. The players have to play in teams of 3 and the concept of the event is as follows:

Morpheus has been captured and must not communicate, otherwise the Cyphers and the Smiths will acquire the codes to the mainframe computers in Zion, the land of the free. Neo and Trinity have decided to rescue Morpheus from The Matrix, destroy The Matrix and rescue the "plugged" humans. Your group plays the role of Morpheus, Neo and Trinity trapped in this simulated world, The Matrix, capable of harvesting humans' bioelectric power.

Modus Operandi:

The sole aim of this mega event was to cohesively focus on young tech minds and bring out the analytical skills and technical competence in them. The winning criterion were:

1. The first team to reach 500 points wins the game.
2. The team which survives all attacks made by other teams and at the same time, defeats all other teams by making similar attacks using attack cards wins the game.

As it goes in the movie, each team has three members, Morpheus, Neo and Trinity. Morpheus has been captured in the Matrix by the agents of Hades, the artificial intelligence antagonist so as to acquire access to the world of humans. To portray the capture of the Morpheus, each Morpheus from the 6 teams which entered the maze at once was made to sit in a different area in the online platform of Gather.town. The Morpheus had to solve a series of puzzles and questions to acquire points, with the help of which, 2 types of cards can be bought viz, attack card and defence card. The attack card can be used to sabotage the efforts of other teams while the defence card is to protect oneself from attacks made by other teams. The main objective of Neo and Trinity is to traverse the maze, all the while encountering agents and defeating them by solving the questions posed by them, thus acquiring points. The Morpheus was to communicate with the other two members so that they can use the cards earned by Morpheus to attack other teams with the help of Operators, who are neutral non-playable characters helping the players in managing the attacks and defences.

At the end of the time slot, the team fulfilling either of the winning criterion was declared the winner.

Participation:

Total Number of Participants- 96

Total Number of Teams- 32

Year- SE, TE, BE, MCA

MASTERMIND

Introduction:

IEEE-VESIT conducts many events as a part of Praxis, the annual technical festival of VESIT. This academic year during e-Praxis, IEEE-VESIT conducted Mastermind, one of its most popular events in the online mode.

Concept:

Mastermind was conducted on 21st April, 2021. The technical team comprising of Alisha Punwani (Sr. Web Editor-D17C), Abhijit Thikekar (Treasurer-D12A), Omkar Mane (EXECOM-D12A), Aditya Mohan (Jr. Web Editor-D17C) and Dinesh Kannan (Jr. Web Editor-D17C), did a commendable job in building the website for Mastermind from scratch providing a bug free online event to the participants. The concept of the game is as follows:

A memory game with a little bit of twist where the participants would have to answer questions to open the memory tile and then match the similar tiles within a very short time span. It was designed so that the students should be able to test and improve their memory power and also test their aptitude and challenge their brain with brain teasers and interesting questions.

Modus Operandi:

Participants are provided with a 10x10 grid with shuffled tiles. For the first 5 seconds, the entire grid is revealed and the players have to try to memorize it as much as they can. After the initial 5 seconds, a 10-minute countdown begins and the tiles are flipped! Now the players need to match the tiles of the grid. There are three types of tiles which either increase or decrease your score. If the player matches two bonus tiles, the score of the player increases. On the other hand, if the player matches two penalty tiles, the score decreases. If the player matches two question tiles, a question pops up. If answered correctly, bonus points are awarded to the player. If the answer is incorrect, points are deducted. If the question is too difficult for the player to answer, there is always an option to skip the question!

Participation:

The event saw a participation of 161 students making this a successful event.

The Overlord: Battle of Kingdoms

Introduction: Every year, IEEE-VESIT conducts numerous technical workshops and events covering various domains. The Overlord: Battle of Kingdoms, was administered by the coordinators of the council with full enthusiasm followed by maximum desired participation from students from all branches and societies of the second year.

Concept: The Overlord: Battle of Kingdoms was a three-hour event scheduled on 24th April, 2021 from 3:30 pm to 6:30 pm. This fun event was designed as well as conducted by the Coordinators of IEEE-VESIT, exclusively for the second-year students. This event was divided into two stages, Stage-1 and Stage-2. The storyline of the event, inspired by various fictional affairs of warriors and kingdoms, was designed as such that the participants excelling in Stage-1 were directed to Stage-2, getting the privileges of the points they scored in the previous stage. Furthermore, a leader-board was maintained by the coordinators so that the participants would get the exact status of their ranking.

Modus Operandi:

Stage 1:

With over 22 registrations (65+ of participants), 18 teams (3 participants per team) managed to participate fully for the event, without any absentees. The platform for conducting the event was Google Meet, for which 3 teams were accommodated in 1 meet for running the event. There were 6 meets for 18 teams, each meet hosted by 2 coordinators. The participants were communicated via WhatsApp groups made for their specific meets. Stage-1 consisted of four tasks, namely Mystery in my Kingdom (to find hidden objects in an image presented), Word Puzzle, Tongue Twisters and Logo Quiz. The coordinators efficiently administered the Stage-1 and the participants loved the tasks, and were indulged in it with full enthusiasm.

Stage 2:

Top six teams were qualified for Stage-2. The participants were evaluated on the basis of the points they scored and the total number of gold (conversion factor) they earned in the previous stage. The Stage-2 was hosted by 1 coordinator with 6 coordinators working in the back-end. The six teams were divided into two alliances where they had to compete in order to win the event. The two alliances were made to attend two different meets where the participants were able to interact with each other. The record of the number of points earned and leader board was displayed on the screen itself, so that the participants were able to track their progress. All the participants played with great zeal and strategically interacted with the fellow participants in order to be the elite alliance.

Participation:

Over 54 students from the second year participated in the event, making it yet another success. The participants not only enjoyed, but also were grateful to the council to organize such kind of events amidst the pandemic where they were given an opportunity to play as well as interact with their friends.
