University of Mumbai

Examinations Summer 2022

Examination: BE Semester VIII

Course Code: ISC801 and Course Name: Instrumentation Project Documentation & Execution

Time: 2 hour30 minutesMax. Marks: 80

1. Select the element which is not part of Engineering project team Option A: Oustomer Option B: Designer Option C: Constructor Option D: Local government body 2. What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6? Option A: D02N04R01S03P06 Option B: D02/N04/R01S03/P06 Option C: D02-N04-R01S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations— Drum level Steam flow Feedwater flow FIT FT FT Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	Q1.	Choose the correct option for following questions. All the Questions are compulsory and carry equal marks
Option A: Customer Option B: Designer Option C: Constructor Option D: Local government body 2. What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6? Option A: D02N04R01S03P06 Option B: D02N04R01S03P06 Option C: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow Compared to the compared t		
Option A: Customer Option B: Designer Option C: Constructor Option D: Local government body 2. What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6? Option A: D02N04R01S03P06 Option B: D02N04R01S03P06 Option C: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow Compared to the compared t	1.	Select the element which is not part of Engineering project team
Option B: Option C: Constructor Option D: Local government body 2. What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6? Option A: D02N04R01S03P06 Option B: D02/N04/R01/S03/P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow FT FT FT Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		
Option C: Constructor Option D: Local government body 2. What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6? Option A: D02N04R01S03P06 Option D: D02/N04/R01/S03/P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Dum level Steam flow Feedwater flow For FIT	_	
Option D: Local government body 2. What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6? Option A: D02N04R01S03P06 Option C: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow Feedwater valve Option A: P & ID Option A: Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	-	
2. What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6? Option A: D02N04R01S03P06 Option D: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations— Drum level Steam flow Feedwater flow FT FT FT Option A: P & ID Option B: Option B: Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	-	
Point 6? Option B: D02/N04/R01/S03/P06 Option C: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow Feedwater valve Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		
Option B: D02/N04/R01/S03/P06 Option C: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow LT FT FT FT FT FT Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	2.	What is correct HW address format for LAN drop 02, Rack 1, Node 4, Slot 3 and Point 6?
Option B: D02/N04/R01/S03/P06 Option C: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow IT FT FT FT FT Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	Option A:	D02N04R01S03P06
Option C: D02-N04-R01-S03-P06 Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow FT FT FT FT FT FECV Feedwater valve Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		D02/N04/R01/S03/P06
Option D: D02R01N04S03P06 3. Identify type of document notations- Drum level Steam flow Feedwater flow FT FT FT FT FT FT FT FT FT FT		
3. Identify type of document notations- Drum level Steam flow Feedwater flow LT FT	_	
Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	- F ·	
Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Shutdown Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	3.	Identify type of document notations-
Option A: P & ID Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		
Option B: PFD Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	Ontion A:	$\begin{array}{c c} & & & & \\ \hline & & \\ \hline & & & \\ \hline & &$
Option C: SAMA Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		
Option D: Loop diagram 4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		
4. Safety Instrumented Systems (SIS) called by following names, excluding Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		
Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	Option D:	Loop diagram
Option A: Safety Interlock Systems Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)		Safety Instrumented Systems (SIS) called by following names, excluding
Option B: Safety Shutdown Systems (SSD) Option C: Basic Process Control System (BPCS)	Option A:	
Option C: Basic Process Control System (BPCS)		
Option D: Emergency Shutdown Systems (ESD)	A - / 17 VO A V 1 / A	
	3275	

5.	Instrument index shall
Option A:	Be created after final execution of the project.
Option B:	Not be revised if there is any plant or system modification.
Option C:	Contain list of instrument devices within a plant.
Option D:	Not include fire and gas related tag numbers.
6.	For instrument specification sheet, which reference documentis required
Option A:	Logic diagrams
Option B:	P & ID
Option C:	Loop diagrams
Option D:	Loop number
7.	For vapor services, drain hole of Orifice plate is located at the,
Option A:	Top of Orifice plate
Option B:	Bottom of Orifice plate
Option C:	Left of Orifice plate
Option D:	Right of Orifice plate
8.	Why a 250 ohm resistor is connected across terminals in junction box at control
	Centre?
Option A:	For protection against noise or impulse.
Option B:	It is used as a part of loop wiring diagram
Option C:	Transmission is by current, reception by voltage, so for I to V conversion it needs
	the shunt,
Option D:	Junction box enclosure earthing is provided using a 250 ohm resistor.
9.	Which statement is not correct regarding bill of material?
Option A:	Can be used for cost estimation
Option B:	Helps to make inventory list.
Option C:	It provides process data.
Option D:	Correct purchasing done.
10.	What is correct sequence followed for procurement process?
	I. Quotation
87 75 10 75 75 18	II. Evaluation
	III. Purchase Requisition Note
	IV. Purchase order
Option A:	T,II,III,IV
Option B:	II,III,I,IV
Option C:	
Option C:	III,IV,I,II
Option D:	[[] [] [] [] [] [] [] [] [] [

Q2(20 Marks)	Solve any Four5 marks each
	Draw and explain Instrument location plan.
Book	Describe junction box scheduling.
75055C.055	Explain FAT and its importance.
8 6 6 D. 6 8 6 8	Draw 5 SAMA and their corresponding ISA symbols.

E.	What are advantages of using software for documentation?	ê
F.	Draw electronic loop wiring diagram for temperature control loop.	Č

Q3 (20 Marks)	Solve any Two 10 marks each
A	Draw and explain the P&ID for a temperature control loop. Prepare
	instrument index sheet for the same and write specification sheet for one of
	the instruments in the loop.
В	Draw hookup diagram for Differential Pressure transmitter.
C.	Illustrate checkout procedure for a control valve.

Q4 (20 Marks)	Solve any Two 10 marks each
A	What are the main tasks of a system integrator? Discuss CFC and SFC in
	detail with suitable example.
В	Explain the components of a SIS. Give a detailed explanation of the Safety
	Integrity Levels.
C.	Explain what is engineering procurement procedure and methods. Also,
	explain the purchase order format.

University of Mumbai Examination Summer 2022

Program: B.E(Instrumentation Engineering)(SEMVIII)(Choice Base Credit

Grading System)(R2016)

Curriculum Scheme: Rev2016 CBCGS Examination: BE Semester: VIII

Program No.: 1T01328, Subject (Paper Code): 53252, Course Name: Instrument and System Design

Time: 2 hour 30 minutes

Max. Marks: 80

Q1.	Choose the correct option for following questions. All the Questions are compulsory and carry equal marks
1.	It is the ability of the sensor to indicate the same output over a period of time for
	a constant input
Option A:	Stability
Option B:	Error STATE OF STATE
Option C:	Impedance SANGER
Option D:	Resolution
	\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\ext{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\}}\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\tex{
2.	When does the thermocouple require reference junction compensation?
Option A:	Thermocouple is installed in very hot conditions
Option B:	Reference terminal may not be held at 0°C
Option C:	Ambient temperature is not stable
Option D:	If reference compensation not done, it will give zero reading for all temperature measurements
3.	What is the significance of piping geometry factor in valve sizing equation?
Option A:	To calculate effect of non-standard pipe run on valve coefficient
Option B:	To calculate valve noise
Option C:	To calculate flashing
Option D:	To calculate effect of cavitation
	\$\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\tin}\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\tetx{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\tetx{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\tin}\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\tex{\tex
4.	Cavitation prediction with the following condition of incipient, critical and actual pressure drop values $\Delta P_i = 6.4 \ psia$
	$\Delta P_c = 9.0 \ psia$
	$\Delta P_{actual} = 9.0 \ psia$
Option A:	Incipient cavitation condition
Option B:	Critical cavitation condition
Option C:	Heavy cavitation condition
Option D:	No cavitation condition
STANGE TO	
255.	Relative valve capacity Cd depends on
Option A:	Type of fluid
Option B:	Cavitation
Option C:	Pipe diameter

O .: D	
Option D:	Valve trim design
6.	What is choked flow?
Option A:	flow rate changes linearly
Option B:	flow rate is minimum
Option C:	flow rate does not increase despite of increase in pressure drop
Option D:	flow rate is linearly reduced
	4.7.4.6.9.8.6.8.8.8.8.8.8.8.8.8.8.8.8.8.8.8.8
7.	The preparation of target specification from wish specification is done
	inphase.
Option A:	Prestudy
Option B:	Study
Option C:	Design 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2
Option D:	Engineering
	85.55.74.56.45.65.65.45.4
8.	Ergonomic study in design engineering is all about
Option A:	Human and machine inspection
Option B:	Human and machine comfort
Option C:	Human and machine maintenance
Option D:	Human and machine testing
	24 44 8 6 2 4 4 6 6 8 8 6 8 6 6 6 6 6 6 6 6 6 6 6 6
9.	Pressurised panels are used in
Option A:	safe area
Option B:	hazardous area
Option C:	dust environment
Option D:	control Room
10.	What is the significance of feedback in the process of System Engineering?
Option A:	It is to depict that the system is very lengthy
Option B:	It is used to skip certain steps in system engineering
Option C:	It demonstrates the iterative nature of system engineering
Option D:	It shows that system engineering is not a good perspective of Design
20,70,40	

Q2	Solve any Two Questions out of Three 10 marks each (20marks)
A	Find valve size for the following conditions
No State	Fluid - Benzene with fine non abrasive solids
	G = 0.88
SAM	q = 450 gpm
O DO	$p_1 = 80 \text{ psia}$
7 B 2	$p_2 = 71 \text{ psia}$
XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX	$T_1 = 528^{\circ} R$
100 V	D = 6 inch schedule 40
	Valve is characterized ball with C _d =25.
В	What is IP classification? Give its significance with few examples.
SC.	What is calibration? List methods of thermocouple calibration and explain the Two wire

method of thermocouple calibration.	1	6	X Q	N.	A S	2/	2	3	20	8	70	3	2	X	Z.

Q3	Solve any Two Questions out of Three 10 marks each (20 Marks)
A	Explain with diagram Control room layout design criteria.
В	3" Butterfly valve is to operate at the following conditions-
	Fluid- Water at flow rate 330gpm
	$P_v = 0.4 \text{ psia}, \qquad P_1 = 24 \text{psia}, \qquad P_2 = 15 \text{psia} \qquad d=3.068$ "
	State whether the valve will cavitate or not, and if it cavitates, to what extent?
С	Explain ergonomics for product design.

Q4	Solve any Two Questions out of Three 10 marks each (20 Marks)
A	Size a valve to pass 6000 lb/hr of dry saturated steam flowing in a 4-inch pipe. The upstream pressure 50 psig and downstream pressure is 41 psig. The valve selected globe style with $C_d = 13$, $X_T = 0.75$. Also correct the X_T for valve reducer.
В	What are methods of noise reduction of control valves
С	Explain Bath tub curve with its significance related to reliability of products.

University of Mumbai Examinations Summer 2022

Time: 2 hour 30 minutes Max. Marks: 80

Q1.	Choose the correct option for following questions. All the Questions are
Q 2.	compulsory and carry equal marks
1.	Economizer is used to heat
Option A:	air
Option B:	flue gases
Option C:	steam
Option D:	feed water
2	
2.	Which of the following is a high head turbine
Option A:	Pelton turbine
Option B:	Kaplan turbine
Option C:	Francis turbine
Option D:	Propeller turbine
3.	Moderator in nuclear plants is used to
Option A:	reduce temperature
Option B:	extract heat from nuclear reaction
Option C:	control the reaction
Option D:	cause collision with the fast moving neutrons to reduce their speed
1	88888888888888888888888888888888888888
4.	Which of the following is a non-renewable energy resource?
Option A:	solar
Option B:	methane
Option C:	Hydroelectric
Option D:	coal
9	
5.	A solar cell converts light energy into
Option A:	Electrical energy
Option B:	Thermal energy
Option C:	Sound energy
Option D:	Heat energy Heat energy
230 X 6 X	Q. Q. Z. J. & B. Q. Q. Q. Q. Z. & D. Z.
6.	What type of energy is derived from heated groundwater?
Option A:	solar energy solar energy
Option B:	geothermal energy
Option C:	hydroelectric energy
Option D:	nuclear energy
	The most nuclear fuel used in the world is
Option A:	Thorium – 232
Option B:	Uranium – 238
Option C:	Uranium – 235
Option D:	Plutonium – 239
000000	
8.	The blades in wind turbines are connected to
Option A:	Nacelle
Option B:	Tower
100 ST 50 ST	

Option C:	Foundations
Option D:	String
9.	The most simple and clean plant is
Option A:	Nuclear power plant
Option B:	Steam power plant
Option C:	Hydro-electric power plant
Option D:	Diesel power plant
10.	Reheat cycle in steam power plant is used to
Option A:	utilize heat of flue gases
Option B:	increase thermal efficiency
Option C:	improve condenser performance
Option D:	reduce loss of heat

Q2.	Solve any Two Questions out of Three 10 marks each
A	Give classification of energy sources in detail.
В	Classify various types of Boilers. Explain Fire Tube Boiler in detail.
С	Draw the layout of Diesel power plant and discuss its operation.

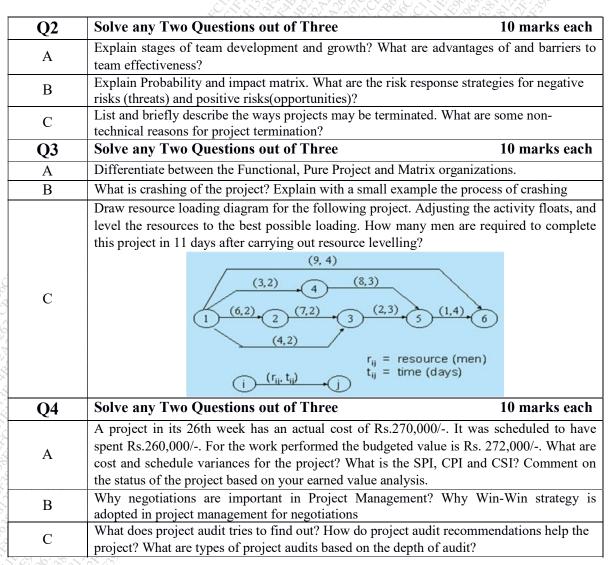

Q3.	Solve any Two Questions out of Three 10 marks each
A	Explain (PWR) Pressurized Water Reactor with neat diagram. State advantages and limitations.
В	Explain wind turbine aerodynamics using Betz model. Find maximum power extracted.
Colling	Give classification of Solar Collectors. Explain flat plate collector with neat diagram.

Q4.	Solve any Two Questions out of Three	10 marks each
X A S S S A S S S S	Give comparison of Thermal, Nuclear and Hydro	electric power plants.
B Explain the energy extraction process from Tidal and Geoth		
What is Hydrology? Explain the factors to be site of Hydroelectric power plant.		idered for selection of

Time: 2 hour 30 minutes Max. Marks: 80

Q1.	Choose the correct option for following questions. All the Questions are compulsory and carry equal marks
1.	Which is an example of Triple Constraint?
Option A:	Scope, Human Resource, Time
Option B:	Quality, Scope, Human Resource
Option C:	Cost, Human Resource, Time
Option D:	Scope, Cost, Time
2.	You are responsible for a project with high risks particularly during the early phases - your sponsor has asked for performance reports on a monthly basis. At the end of the first month you report a CPI greater than 1 and also the SPI greater than 1. What would this mean?
Option A:	The project is behind schedule and over budget
Option B:	The project is ahead of schedule and under budget
Option C:	The project is ahead of schedule but over budget
Option D:	The project is behind schedule but under budget
3.	Why does activities on critical path of a CPM network are called critical
Option A:	They represent maximum project completion time
Option B:	They cannot tolerate any delay in completion
Option C:	They consume maximum resources
Option D:	These are most complex activities on project
4.	A risk is known as Positive risk or opportunity if-
Option A:	Impact is negative which you want to lessen its impact
Option B:	Impact is positive which you want to lessen its impact
Option C:	Impact is negative which you may want to actualize
Option D:	Impact is positive which you may want to actualize
5.	The lowest element in the hierarchical breakdown of the WBS is
Option A:	Deliverable
Option B:	Work package
Option C:	Responsibility matrix
Option D:	Bottoms up budget
6.	When many activities are planned to start at the same time in project schedule, the project
	is likely to be following
Option A:	Concurrent Engineering
Option B:	Research and Development Project
Option C:	Goldratt's Critical Chain
Option D:	laddering approach
7.	The payback period for a project
Option A:	is the internal rate of return that is the discount rate that equates the present values of the two sets of flows.
Option B:	is the discounted cash flow method determines the net present value of all cash flows by discounting them by the required rate of return
	is the initial fixed investment in the project divided by the estimated annual net cash

	inflows from the project.
Option D:	is also known as the benefit-cost ratio
8.	A project is over budget when
Option A:	CPI > 1
Option B:	SPI > 1
Option C:	CPI and SPI > 1
Option D:	CPI less than 1
9.	Select the correct statement from the following
Option A:	There is always only one critical path in the network
Option B:	A path is called a critical path if it is the longest path in a project network
Option C:	Slack or float of dummy activity is always equal to zero
Option D:	Crashing cost linearly increases with no of days crashed
10.	Project closure when the project is completed as planned is
Option A:	Failed projects

Examination: BE VIII

Course Code: ISDLO8043 and Course Name: Internet of Things(IOT)

Time: Max. Marks: 80

Q1.	Choose the correct option for following questions. All the Questions a compulsory and carry equal marks		
1.	Compulsory and carry equal marks Which of this is part of the Transport Layer		
Option A:	TCP		
Option B:	802.11		
Option C:	MQTT		
Option D:	6LowPAN		
2.	Zigbee uses which Layers		
Option A:	802.4.15		
Option B:	802.15.4		
Option C:	802.11		
Option D:	803.13g		
3.	Which protocol is storage Interface		
Option A:	MMC		
Option B:	SPI		
Option C:	UART		
Option D:	I2C		
4.	MQTT is oriented.		
Option A:	Data		
Option B:	Message		
Option C:	Network		
Option D:	Device		
5.	ISM stands for		
Option A:	Industry Standard Machine		
Option B:	Industrial Software Machine		
Option C:	Integrated Scientific Medical		
Option D:	Industrial Scientific Medical		
6.	PaaS Stands for		
Option A:	Platform as a Server		
Option B:	PANID as a Server		
Option C:	Platform as a Software		
Option D:	Peripheral as a Software		
7.	Controller Service		
Option A:	precess actuator and sensor data and have network elements		
Option B:	links between IOT device application and database components		
Option C:	stores the data		
Option D:	runs on device and interacts with server		

Paper code 90311

8.	Which statement is False for the below statements	
Option A:	The channel is hardcoded in Zigbee software	
Option B:	The device checks for the channel before transmitting	
Option C:	Messsages are coded to improve the reliability of link	
Option D:	Acknowledgements are used	
9.	Which is Data Exchange Format	
Option A:	XML	
Option B:	XMPP	
Option C:	MQTT	
Option D:	YANG	
10.	what is frequency on which 802.15.4 works	
Option A:	2.1Ghz	
Option B:	466Mhz	
Option C:	5Ghz	
Option D:	2.4Ghz	

Q2 (20 Marks Each)	Solve any Four out of Six 5 marks each
A	Explain what is a Gateway
В	Advantages of COAP over HTTP
С	Explain PAAS
D	Explain MODBUS protocol
Е	Explain Topology that the Wifi Supports
F	Explain the ISM band used by 802.15.4

Q3 (20 Marks Each)	Solve any Two Questions out of Three 10 marks e	
A	Explain difference between End Node, PAN co-ordin Zigbee	nator and Router in
В	Explain in detail IOT Level 3 and IOT Level 4	
C	Explain in detail the Definition and characterization of	of IOT

Q4 (20 Marks Each)	
Α	Explain using the application of IOT for Environment Monitoring a. Purpose b. Data requirement c. Hardware deployment d. Software deployment
В	Explain GSM essential components
C	Explain the benefits, features, Stakeholders in Cloud Architecture
