

Please check whether you have got the right question paper.

NR:

1. Question 1 is compulsory
2. Solve any three out of remaining.
3. Assume suitable data if necessary
4. Draw proper diagrams

Q.1. Solve any four.

20

- a. What are different MOS capacitances? Explain in brief.
- b. Implement  $Y = (A + B) \cdot (C + D)$  Using pseudo NMOS logic.
- c. What is low power design in VLSI circuits?
- d. Define scaling. Explain significance of scaling in VLSI circuits.
- e. Explain working of 1-T DRAM cell.

- a. Explain CMOS inverter characteristics mentioning all regions of operation. What is the effect of changing W/L ratio on it? Explain with example.

10

- b. Implement 4:1 mux using pass transistor logic. Explain advantages of using transmission gates.

10

- a. Derive equations for noise margin for CMOS inverter.

10

- b. Explain working of 6-T SRAM cell.

10

- a. Explain clock generation networks and distribution networks used in VLSI circuits.

10

- b. What is fast adder? Explain any one schemes for fast adder.

10

- a. Explain pseudo NMOS logic and hence implement 2 I/P NAND gate.

10

- b. Explain various ESD protection schemes.

10

Q.2. Write a short note on.

20

- a. Barrel shifter
- b. NOR based ROM array
- c. Interconnect scaling
- d. Level-1 and Level-2 MOS models.

**Q. P. Code: 36415**

**Time: 3 hours**

**Total Marks: 80**

**Note:** 1) Question No.1 is compulsory.

2) Attempt any three questions from remaining five questions.

3) Assume suitable data if necessary.

4) Figures to the right indicate full marks.

- Q.1)** Explain in brief
- a) Integral controller 5M
  - b) Telemetry 5M
  - c) I-P converter 5M
  - d) Pneumatic logic gates 5M
- Q.2)** a) Compare conventional and smart transmitters. Explain the working of DP transmitter. 10M
- b) What are the different characteristics of data loggers? Draw the block diagram of data logger and explain its working? 10M
- Q.3)** a) Explain compressed air receiver unit. What are the different control strategies for air receiver unit? 10M
- b) Explain detail cylinder construction with its dynamics. 10M
- Q.4)** a) What is the need of composite controller? Explain PI controller in detail. 10M
- b) Give the classification of compressors. Explain any two rotary compressors with diagram. 10M
- Q.5)** a) Explain loading of valves in pump application with diagram. 10M
- b) Give the classification of control valve based on characteristic, plug design etc. 10M
- Q.6)** a) Give the comparisons of electrical, hydraulic and pneumatic systems. 10M
- b) Brief the classification of hydraulic pumps. Draw neat sketches of any three hydraulic pumps and explain the working. 10M

\*\*\*\*\*

Duration: 3 Hours

Marks: 80

NB : (1) Question No.1 is compulsory.

(2) Attempt any three questions from remaining questions.

(3) Figures to the right indicate full marks.

- Q1(a) Explain restoring division algorithm and draw its flowchart. 5
- (b) Describe the concept of Nanoprogramming. 5
- (c) Compare paging and segmentation. 5
- (d) Draw the register structure of IA-32 family. 5
- Q2 (a) What is the necessity of replacement algorithm? Explain how pages are replaced between cache memory and main memory using replacement policies : 10
- (i) LRU (ii) FIFO
- (b) Explain the structure of serial and parallel ports. What are the methods to access it? 10
- Q3 (a) Explain in detail any one hardwired technique of control unit design. 10
- (b) Explain various DMA transfer modes with diagrams. 10
- Q4 (a) Explain the advantages of pipelining. Explain various types of pipeline hazards and solutions to prevent them. 10
- (b) Explain concept of cache memory with reference to principle of locality and Hit ratio Draw and explain different architectures of cache memory. 10
- Q5 (a) What are different addressing modes of IA-32 family? Explain with examples. 10
- (b) Explain single bus and multiple bus organization. 10
- Q6 (a) Explain the Virtual Address to Physical address Translation for the following specifications Virtual Memory=128k and Main Memory=32k, page size = 1k. Illustrate Page Fault with the help of an example. 10
- (b) Explain execution of a complete instruction with details. How are branch instructions executed? Use Single Bus organization. 10

[Total Marks: 80]

(3 Hours)

- NB:** 1) Question No. 1 is compulsory.  
2) Attempt any 3 questions out of remaining questions.  
3) Figures on the right hand side indicate full marks.  
4) Assume Suitable data if necessary

**Q1** Answer any four

- a) Explain different commutation techniques for SCR. Draw current commutation circuit 20
  - b) Draw and explain gate characteristics.
  - c) What is the need of freewheeling diode in rectifiers? Explain with suitable diagrams.
  - d) Explain Type B DC-DC converter.
  - e) Explain why harmonic neutralization is necessary in the output of inverter.
- Q2 a)** Draw and explain single phase fully controlled converter with RL load. Draw load current, Load voltage, input voltage and gating signal for  $\alpha = 60^\circ$  10
- b) Explain the working of three phase bridge inverter in  $120^\circ$  conduction mode with circuit diagram and waveforms. 10
- Q3 a)** Draw and Explain dynamic characteristics of thyristor. 10
- b) Explain working principle of  $1 \Phi$  cyclo converter with circuit diagram and waveforms. 10
- Q4 a)** A single phase fully controlled converter is operated from 230V, 50 Hz ac supply. The load resistance is  $10 \Omega$ . The average output voltage is 10% of max possible average output voltage. Calculate- i) Firing angle 10  
ii) RMS and Average output current  
iii) Efficiency
- b) Draw and explain the working of  $3\Phi$  fully controlled rectifier with neat circuit diagram and waveforms. 10
- Q5 a)** Draw and explain AC voltage control circuit using DIAC and TRIAC. Draw the waveforms with  $\alpha = 60^\circ$ . 10
- b) Draw and explain Buck converter with waveforms. Also derive the expression for output voltage. 10

[PTO...]

Q6 Write short notes on (Any Four)

- Compare IGBT, MOSFET.
- Protection circuits for SCR.
- Driver circuits for power transistors.
- Various PWM techniques.
- Ramp and Pedestal control triggering.

N.B.

- 1] Question number ONE is compulsory.
- 2] Attempt any THREE questions from remaining questions.
- 3] All questions carry equal marks.

Q1] Answer any four questions

- a] Compare Butterworth and Chebyshev filters. 5
- b] Compare FIR and IIR filters. 5
- c] Compute the DFT of the sequence  $x(n) = \{0, 1, 2, 1\}$  5
- d] What is Frequency prewarping in Bilinear transformation method? Why it is required. 5
- e] Explain the speed improvement in calculating the DFT using FFT. 5

Q2] a] Find DFT of the following sequence using DIT FFT algorithm.

10

$$x(n) = \{1, 1, 1, 1, 1, 1, 0\}$$

b] Find the circular convolution of the two finite duration sequences

10

$$x_1(n) = \{1, -1, -2, 3, -1\} \quad x_2(n) = \{1, 2, 3\}$$

Q3] a] Design a Butterworth digital IIR low pass filter using Bilinear transformation by taking  $T=1$  second, to satisfy the following specifications.  $0.707 \leq |H(e^{j\omega})| \leq 1.0 : 0 \leq \omega \leq 0.2\pi$

$$|H(e^{j\omega})| \leq 0.08 : 0.4\pi \leq \omega \leq \pi$$

10

b] Given that,  $H(s) = 1/(s+1)$ . By impulse invariant method, obtain the digital filter transfer function  $y(n)$ .

10

Q4] a] Explain different addressing modes of TMS 320 c67XX.

10

b] Explain VLIW architecture in detail.

10

Q5] a] Design a linear phase FIR highpass filter using hamming window, with a cutoff frequency,  $\omega_c = 0.8\pi$  rad/sample and  $N = 7$

10

b] Explain Frequency sampling method of designing FIR filter?

10

Q6] Write short notes on (any two)

- a] Effect of quantization in computation of DFT.
- b] Application of DFT to Radar signal Processing.
- c] Gibbs Phenomenon.

10

10

10

Duration: 2 Hours

Marks-40

Note:

- i. Q.1 is compulsory
- ii. Attempt any three questions from remaining five.
- iii. Each question carries equal marks.

1. Answer any five.

- a. Which are the components of IT Infra? 2
  - b. Write any four top security concerns. 2
  - c. Explain optical storage. 2
  - d. Explain World Wide Web. 2
  - e. What do you mean by cabling? 2
  - f. Define Information architecture. 2
  - g. Differentiate between single mode and multimode fiber. 2
- a. Define topology. Explain any three common topologies. 5
  - b. Explain wireless LAN technologies with their advantages. 5
- a. Explain Simple Network Management Protocol. 5
  - b. Explain seven layer OSI stack. 5
- a. Illustrate Enterprise Resource planning (ERP) and its need in detail. 5
  - b. Write a short note on following web authoring tools. 5
    - i) SGML
    - ii) HTML
- a. Which are the three main types of storage? Write a short note on each. 5
  - b. Explain Password management System. 5
- a. Write a note on following terms related to IT audit. 10
    - i) Information audit
    - ii) Audit schedule
    - iii) Audit plan
    - iv) Audit preparation
    - v) Internal audit
