Library as a Learning Resource

Library is partially automated using Integrated Library Management System (ILMS)

Library plays an important role in supporting academic programmes of VESIT. It provides access to information resources like books, journals, newspapers, and other resources such as e-books, e-journals, videos, CDs and DVDs which broadens the horizon and stimulates the thought process of the readers.

VESIT library has a diverse collection of 49,585 text books and reference books, 2,330 e-journals, and 10,613 e-books. The majority of books and journals fall in the domain of Computer Science, Information Technology, Electronics Engineering, Communication Engineering, Instrumentation, Artificial Intelligence, Data Science, Humanities & Applied Sciences etc. New titles are added every year to widen the spectrum of books in the library including management, art and literature.

In the current age of technology library automation is extremely essential. There is a huge need for access to the desired literature for the stupendous growth in the various fields of knowledge. Keeping that in mind VESIT uses LiBSUITE library automation software which is an initiative to strengthen the eco-friendly move to reduce the use of paper and smoothen the day to day functioning of our library.

Turnitin software is used to check the similarity index of the research documents.

Functioning of VESIT ILMS (LiBSUITE)

LiBSUITE for Windows version 6.0 is an integrated software package that caters to the various aspects of library management. LiBSUITE has been divided into operational modules to deal with each of these aspects. LiBSUITE is very user-friendly allowing users with little or no previous background in using computers to get acquainted and exploit all the features offered by it. Computerisation of any library leads to efficient and fast data retrieval and is by far the most useful feature. It offers advanced and complex algorithms for bibliographic searches. **LiBSUITE is Partially automated.** Users can issue/return and search the books online through WEBOPAC. Systems are provided for accessing digital libraries with high-speed Internet connection.

Vivekanand Education Society's Institute of Technology

(Affiliated to University of Mumbai, Approved by AICTE & Recognized by Govt. of Maharashtra)

Books Acquisition system followed in Library:

- Librarian makes a list of recommended books and sends it to identified Vendors for price quotations.
- Library supporting staff fill the Indent for the books requisition through the software by **Khushi**.
- Price quotations along with the Indent, comparative statement and requisition form are sent to the Purchase Manager to decide the vendor for supply.
- Received books are cross verified by Librarian as per the order placed. Book is then entered into the Accession register.
- New arrivals are displayed on the library notice board.

Name of ILMS software - LiBSUITE Library Automation Software

- Nature of automation (fully or partially) - Partially
- Version - 6.0
- Year of Automation - 2010

The LibSuite is a totally integrated Information Management System designed specifically for efficient management of a Library. This is achieved by structuring the processes and work flow within a library into functionally independent modules catering to different tasks so as to result into optimum resource management.

By launching your Library onto the World Wide Web ensures availability of information geographically from anywhere and at any time. The Library, in effect, becomes a virtual digital information resource in cyberspace.

Library Management

The Front Desk Operations are handled from this module. You can Issue, Return and Renew documents from here. The circulation data is seamlessly maintained on the WEB making it globally accessible. You may Reserve documents on-line from here and physically collect from the Library at any time convenient. Various Circulation related Reports and Statistics may also be generated to analyse the transaction volumes.

The maintenance of data on various types of material (e.g Books, CD's, Engg. Drawings etc.) held by any Information Centre is handled from this module. LibSuite individual element is therefore generically called a document and its information is stored in the Accession Register. You may Add additional Copies of existing documents from the module. Documents borrowed on Inter-Library Loan from other Libraries are recorded from this module.

Accession Register
Use this option to add information about books, maps etc. You may change, delete the existing information using this option.

Add copy
Use this option to add a copy of a old document.

Change Accession No
This option is used to change the accession number of a already entered book.

Inter Library Loan
This option is used to enter the information about books transacted from other Library.

Reports
Holding status, missing accession numbers and similar reports can be generated using this option.
