In order to support the students of VESIT in the dire situation, VESIT Alumni Association (VESITAA) decided to provide laptops to a select few needy students (one student from each department). This decision of short listing the student was taken after consultation with the respective department HODs and the scholarship team of VESIT.

Overall 14 laptops were distributed of which six (06) laptops were provided by VESITAA to one student of each department respectively, one (01) laptop was donated by Mr. Gautam Muridhar, two laptops(02) were given by Mr. Vijay Talreja while five (05) laptops were given by Mr. Niraaj Gunde respectively.

The laptop distribution took place in VESIT premises on Wednesday, the 11th of November 2020, at 11:30 am, room no 208. The laptops were handed over to the students by the Vice Principal Dr. M. scholarships to the needy students. Another lakhs can also be utilized to provide resources to the needy students. It was also planned that a further appeal will be done to the Alumni for 3 lakhs so as to have a budget of 5 lakhs to sponsor laptops to needy students .

Mr. Nayan added that the options available are that either the laptops can be procured through the CSR teams of companies like TCS and on utilization of the laptops, the laptops could be utilized by VESIT in a lab. Second option provided was that the laptops could be procured on a rental basis and handed over to students.

As of now, it was decided to utilize the funds from the Alumni Association.

2.Alumni Charter :

The status of alumni charter was enquired from Dr. Manoj Sabnis. He informed all the members present that due to the current COVID situation it is not possible to submit the charter physically to the Worli office . So this work can be done only when the situation gets back to normal.

UnBlock Subsidy (UBS) is a platform where we aim to revolutionize the process of disbursing subsidy by using cutting edge technologies for application development and using Blockchain as a backbone to implement the process. UBS decentralizes the current Subsidy Distribution System using the Blockchain Paradigm which increases the trust factor among stakeholders. Current implementation of UBS has 3 roles, User which is the beneficiary of the scheme, Government who is the maker of the scheme, Distributor who is responsible for disbursing approved scheme. UBS can act as a potential service provider for subsidy scheme system, as the system enables Identification of truthful beneficiaries.

Problem statement was based on the RCS scheme launched by the ministry of civil aviation.They wanted an analysis dashboard where the ministry can monitor the bookings of RCS seats. Our idea for this was that we will make a channel for the booking of every RCS seats by every 3rd party .

Every time a person books an RCS seat it will go through our channel to authorise and authenticate their booking to ensure that they aren't charged more price than the RCS rate. Also if a person cancels his/her RCS seat , the next person who had booked the seat at the market price will get the required discount and refund. Apart from this we also prepared a dashboard which would detect the fraudulent transactions for ministry and can also produce various charts for comparison.
