Recognized by Govt. of Maharashtra)  
NAAC accredited with 'A' Grade

## Department of Humanities & Applied Sciences

**Course Prerequisite:** Matrices and Matrix Operations, Algebraic Properties of Matrices, Method for Finding inverse of a matrix- By elementary transformation and by adjoint of a matrix, Types of real matrices, Basics of Differentiation, Basics of Differential Equations

### Course Objectives:

|   |                                                                                                   |
|---|---------------------------------------------------------------------------------------------------|
| 1 | To provide students with contemporary knowledge about different types of Matrices and their Ranks |
| 2 | To learn about concept and applications of complex numbers                                        |
| 3 | To explore the solution methods using Partial derivatives and its concepts.                       |
| 4 | To apply concept of Partial differentiation to find extreme values of a function                  |
| 5 | To learn about solution methods of first order and first degree ordinary differential equations   |

### Course Outcomes:

|   |                                                                                                                                                                                                               |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Students would develop the ability to understand and work with real and complex matrices, their properties, ranks and apply these concepts to solve problems in various fields.                               |
| 2 | Students should be introduced to complex functions and their properties. Also understand the concept of using De' Moivre's application to find roots and power of complex numbers.                            |
| 3 | Students are able to gain an overview of partial derivatives which is used for solving various engineering problems.                                                                                          |
| 4 | Student would develop the ability to apply concept of partial differentiation to find extreme values of a function.                                                                                           |
| 5 | Students would develop the ability to analyze and solve first order and first degree ordinary differential equations, apply mathematical techniques to interpret the solutions in the context of the problem. |

| Module | Content                                                                                                                                                                      | Hrs |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1      | <b>Matrices and its application</b>                                                                                                                                          | 6   |
|        | 1.1 <b>Real and Complex Matrices:</b> Orthogonal Matrices, Symmetric Matrices, Skew-symmetric matrices, Hermitian, Skew-hermitian Unitary matrices (Properties and Examples) |     |
|        | 1.2 <b>Rank of a Matrix:</b> Elementary Matrices, rank of a matrix by Echelon form and Normal form                                                                           |     |

### Textbooks:

|   |                                                                                                 |
|---|-------------------------------------------------------------------------------------------------|
| 1 | R.K.Jain and S.R.K.Iyengar "Advanced Engineering Mathematics", Alpha science International Ltd. |
| 2 | Advanced Engineering Mathematics, H.K Dass, S. Chand Publications                               |

### Reference Books:

|   |                                                                                          |
|---|------------------------------------------------------------------------------------------|
| 1 | Erwin Kreyszig, "Advanced Engineering Mathematics", John Wiley & Sons, Inc               |
| 2 | B.S. Grewal, "Higher Engineering Mathematics", Khanna Publication                        |
| 3 | George B. Thomas, Weir & Hass, "Thomas' Calculus", Pearson                               |
| 4 | George F. Simmons, "Differential Equations with Application", Tata Mc. Graw Hill Edition |
| 5 | Howard Anton, Chris Rorres, "Elementary Linear Algebra", Wiley Publication               |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

### Continuous Assessment:

Continuous Assessment is of 20 marks. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| Sr. No | Rubrics                                                                 | Marks    |
|--------|-------------------------------------------------------------------------|----------|
| 1      | Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC | 10 marks |
| 2      | Wins in the event/competition/hackathon                                 | 10 marks |
| 3      | Content beyond syllabus presentation                                    | 10 marks |
| 4      | Creating Proof of concept                                               | 10 marks |

|    |                                                                                                                                                            |          |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 5  | Mini Project / Extra Experiments/ Virtual Lab                                                                                                              | 10 marks |
| 6  | GATE Based Assignment test/Tutorials etc                                                                                                                   | 10 marks |
| 7  | Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes) | 05 marks |
| 8. | Multiple Choice Questions (Quiz)                                                                                                                           | 05 marks |
| 9. | Peer Review and participation the marks can be left blank (with discretion of faculty)                                                                     | 05 Marks |

| End Semester Theory Examination: |                                                            |
|----------------------------------|------------------------------------------------------------|
| 1                                | Question paper will be of 60 marks                         |
| 2                                | Question paper will have a total of five questions         |
| 3                                | All questions have equal weightage and carry 20 marks each |
| 4                                | Any three questions out of five need to be solved.         |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

## Department of Humanities & Applied Sciences

### Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| Sr. No | Rubrics                                                                                                                                                    | Marks    |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 1      | Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC                                                                                    | 10 marks |
| 2      | Wins in the event/competition/hackathon                                                                                                                    | 10 marks |
| 3      | Content beyond syllabus presentation                                                                                                                       | 10 marks |
| 4      | Creating Proof of concept                                                                                                                                  | 10 marks |
| 5      | Mini Project / Extra Experiments/ Virtual Lab                                                                                                              | 10 marks |
| 6      | GATE Based Assignment test/Tutorials etc                                                                                                                   | 10 marks |
| 7      | Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes) | 05 marks |
| 8.     | Multiple Choice Questions (Quiz)                                                                                                                           | 05 marks |
| 9.     | Peer Review and participation the marks can be left blank (with discretion of faculty)                                                                     | 05 Marks |

### End Semester Theory Examination:

|   |                                                            |
|---|------------------------------------------------------------|
| 1 | Question paper will be of 60 marks                         |
| 2 | Question paper will have a total of five questions         |
| 3 | All questions have equal weightage and carry 20 marks each |
| 4 | Any three questions out of five needs to be solved.        |

### Engineering Physics (Lab)

**Suggested Experiments:** Students are required to complete at least 10 experiments.

Star (\*) marked experiments are compulsory.

| Sr. No. | Name of the Experiment |
|---------|------------------------|
|---------|------------------------|

|    |                                                                                             |
|----|---------------------------------------------------------------------------------------------|
| 1  | Determination of 'h' using Photo cell.                                                      |
| 2  | Determination of energy band gap of semiconductor                                           |
| 3  | Study of Hall Effect                                                                        |
| 4  | Study of PT100 calibration and use as thermometer.                                          |
| 5  | Determination of Numerical Aperture of an optical fiber.                                    |
| 6  | Study of I-V characteristics of Photo diode.                                                |
| 7  | Charging and discharging characteristics of supercapacitor.                                 |
| 8  | Study of divergence of laser beam                                                           |
| 9  | Determination of number of lines on the grating surface using LASER Source.                 |
| 10 | Determination of radius of curvature of a lens using Newton's ring set up                   |
| 11 | Determination of diameter of wire/hair or thickness of paper using Wedge shape film method. |
| 12 | Determination of wavelength using Diffraction grating. (Hg/Na source)                       |

**Note:** Suggested List of Experiments is indicative. However, flexibilities lie with individual course instructor to design and introduce new, innovative and challenging experiments, (limited to maximum 30% variation to the suggested list) from within the curriculum, so that, the fundamentals and applications can be explored to give greater clarity to the students and they can be motivated to think differently.

| Term Work: |                                                                                                                                                 |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1          | Term work should consist of 10 experiments.                                                                                                     |
| 2          | The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. |
| 3          | Total 25 Marks<br>(Experiments: 15-marks, Term work Assessment: 10-marks)                                                                       |

## Department of Humanities & Applied Sciences

| Course Objectives: |                                                                                                                                                                                                  |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1                  | To create a strong foundation in basic principles of statics and to apply the knowledge to analyze and solve engineering problems involving different systems of forces, static equilibrium etc. |
| 2                  | To understand the principles and methods used to analyze the motion and behavior of particles and rigid bodies without the influence of forces.                                                  |
| Course Outcomes:   |                                                                                                                                                                                                  |
| 1                  | Understand and analyze the behavior of multiple forces acting in a single plane.                                                                                                                 |
| 2                  | Understand the conditions for a body to be in a state of equilibrium and to analyze and solve problems related to the equilibrium.                                                               |
| 3                  | Understand and predict motion, analyze velocity and acceleration, characterize different types of motion without consideration of mass of the body.                                              |
| 4                  | Do kinematic analysis of linkages and mechanisms by locating instantaneous center of rotation.                                                                                                   |

### Engineering Mechanics (Theory)

| Module | Content                                                                                                                                                                                                                                                                                                                                                                                                                                               | Hrs |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1      | <b>System of Coplanar Forces:</b><br>Classification of force systems, Principle of transmissibility, composition and resolution of forces. Resultant of coplanar force system (Concurrent forces, parallel forces and non-concurrent Non-parallel system of forces). Moment of force about a point, Couples, Varignon's Theorem. Force couple system. Distributed Forces in plane.                                                                    | 06  |
| 2      | <b>Equilibrium of System of Coplanar Forces:</b><br>Equilibrium concept, Conditions of equilibrium for concurrent forces, parallel forces and non-concurrent non- parallel general forces and Couples. Free body diagrams. Equilibrium of rigid bodies. Types of beams, simple and compound beams, type of supports and reaction. Determination of reactions at supports for various types of loads on beams. (Excluding problems on internal hinges) | 08  |
| 3      | <b>Kinematics of Particle:</b><br>Motion of particles with variable acceleration. Motion curves. Application of concepts of projectile motion and related numerical. Motion under gravity.                                                                                                                                                                                                                                                            | 06  |

| 9 | Engineering Mechanics (Dynamics) by Meriam and Kraige, WileyBools |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

### Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| 1           | <b>Orthographic Projections:</b><br>Fundamentals of orthographic projections. Different views of a simple machine part as per the first angle projection method recommended by I.S.       | 08          |
| 2           | <b>Sectional Orthographic Projections:</b><br>Basic concept and significance of sectional orthographic projections. Full sectional view of simple machine parts (Excluding half section). | 08          |
| 3           | <b>Isometric Views:</b><br>Isometric Views, Conversion of Orthographic Views to Isometric Views (Excluding Sphere and circle on an inclined plane).                                       | 08          |
| Total Hours |                                                                                                                                                                                           | 24          |

### AutoCAD (Lab)

#### Lab Objectives:

|   |                                                              |
|---|--------------------------------------------------------------|
| 1 | To inculcate the skill of drawing with the basic concepts.   |
| 2 | To Use AutoCAD for daily working processes.                  |
| 3 | To teach basic utility of Computer Aided drafting (CAD) tool |

#### Lab Outcomes: Students will be able to...

|   |                                                                                     |
|---|-------------------------------------------------------------------------------------|
| 1 | Apply the basic principles of projections in 2D drawings using CAD software.        |
| 2 | Create, Annotate, Edit and Plot drawings using basic AutoCAD commands and features. |
| 3 | Apply basic AutoCAD skills to draw different views of a 3D object.                  |
| 4 | Apply basic AutoCAD skills to draw the isometric view from the given two views.     |

| Sr No. | Topic                                                                                                                                                                                                                                                                                        | No. of Hrs. |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| 1      | <b>Overview of Computer Graphics Covering:</b><br>Listing the computer technologies that impact on graphical communication, demonstrating knowledge of the theory of CAD software such as: The Menu System, Toolbars (Standard, Object Properties, Draw, Modify and Dimension), Drawing Area | 08          |

NAAC accredited with 'A' Grade

## Department of Humanities & Applied Sciences

**Prerequisite:** Resistance, inductance, capacitance, series and parallel connections of resistance, concepts of voltage, current, power and energy and its units. Working of wattmeter, Magnetic circuits, MMF, Magnetic field strength, reluctance, series and parallel magnetic circuits, BH Curve, Time domain analysis of first order RL and RC circuits

### Course Objectives:

|   |                                                                                                                        |
|---|------------------------------------------------------------------------------------------------------------------------|
| 1 | To provide knowledge on fundamentals of DC circuits and single phase and three phase AC circuits and its applications. |
| 2 | To inculcate knowledge on the basic operation and performance of 1- $\Phi$ transformers.                               |
| 3 | To provide knowledge on fundamentals of DC and AC machines.                                                            |

### Course Outcomes:

|   |                                                                               |
|---|-------------------------------------------------------------------------------|
| 1 | Apply various network theorems to determine the circuit response / behavior.  |
| 2 | Evaluate and analyze 1- $\Phi$ circuits.                                      |
| 3 | Evaluate and analyze 3- $\Phi$ AC circuits.                                   |
| 4 | Understand the constructional features and operation of 1- $\Phi$ transformer |
| 5 | Illustrate the working principle of a DC machine.                             |
| 6 | Illustrate the working principle of AC machines.                              |

| NES13       | Basic Electrical Engineering (Lab) | ---                              | ---                   | ---          | 25               | -         | 25    |       |

#### Lab Objectives:

|   |                                                                           |
|---|---------------------------------------------------------------------------|
| 1 | To impart the basic concept of network analysis and its application.      |
| 2 | To provide the basic concept of ac circuits analysis and its application. |
| 3 | To illustrate the operation of machines and transformers.                 |

#### Lab Outcomes

|   |                                                                           |
|---|---------------------------------------------------------------------------|
| 1 | Interpret and analyze the behavior of DC circuits using network theorems. |
| 2 | Perform and infer experiment on single phase AC circuits.                 |
| 3 | Demonstrate experiment on three phase AC circuits.                        |
| 4 | Illustrate the performance of single-phase transformer and machines.      |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

### Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| 4  | Verification Thevenin's Theorem/ Norton's Theorem.                                                         |
| 5  | Verification Maximum Power Transfer Theorem.                                                               |
| 6  | To find resonance conditions in a R-L-C series resonance circuit                                           |
| 7  | To find resonance conditions in a R-L-C parallel resonance circuit.                                        |
| 8  | To measure relationship between phase and line, currents and voltages in three phase system (star & delta) |
| 9  | To measure Power and phase in three phase system by two wattmeter method.                                  |
| 10 | To find the equivalent circuit parameters by conducting OC and SC test on single phase transformer.        |
| 11 | To demonstrate cut-out sections of DC machine.                                                             |
| 12 | To study AC machine.                                                                                       |

**Note:** Suggested List of Experiments is indicative. However, flexibilities lie with individual course instructor to design and introduce new, innovative and challenging experiments, (limited to maximum 30% variation to the suggested list) from within the curriculum, so that, the fundamentals and applications can be explored to give greater clarity to the students and they can be motivated to think differently.

| Term Work: |                                                                                                                                                 |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1          | Term work should consist of 10 experiments.                                                                                                     |
| 2          | The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. |
| 3          | Total 25 Marks<br>(Experiments: 15-marks, Term work Assessment: 10-marks)                                                                       |

#### Course Objectives:

|   |                                                                                                                                                                                    |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Students will gain an understanding of the origins, history, and philosophy behind Vedic Mathematics, which is based on ancient Indian mathematical techniques found in the Vedas. |
| 2 | They will develop skills to perform arithmetic operations such as addition, subtraction quickly and efficiently.                                                                   |

## Department of Humanities & Applied Sciences

|                         |                                                                                                                                                                                                             |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3                       | They will learn various techniques to perform multiplication with any number of digits using vedic sutras and also learn to perform multiplication in algebra to solve equations                            |
| 4                       | They will learn various techniques to find square and square roots of any number of digits using vedic sutras                                                                                               |
| 5                       | They will learn various techniques to find cube a,fourth power ,cube roots and fourth root of any number of digits using vedic sutras                                                                       |
| <b>Course Outcomes:</b> |                                                                                                                                                                                                             |
| 1                       | Students will develop the ability to perform mathematical calculations mentally and quickly using Vedic techniques.                                                                                         |
| 2                       | Students will enhance their mental math skills and be able to perform arithmetic operations such as addition, subtraction, multiplication, and division mentally, without relying heavily on paper and pen. |
| 3                       | They will learn to apply Vedic sutras and methods to solve a wide range of mathematical problems, including algebraic equations.                                                                            |
| 4                       | They will be able to break down complex problems into simpler steps and apply Vedic techniques to arrive at solutions more easily.                                                                          |
| 5                       | They will learn alternative approaches and multiple methods to solve mathematical problems, fostering creativity and adaptability in their problem-solving approach.                                        |

| Module | Content                                                                                   | Hrs |
|--------|-------------------------------------------------------------------------------------------|-----|
| 1      | <b>History and evolution of Vedic Mathematics</b>                                         | 1   |
|        | 1.1 Historical facts about Vedic Mathematics                                              |     |
|        | 1.2 Sutras and sub sutras of Vedic Mathematics                                            |     |
| 2      | <b>Vedic sutras for addition and subtraction</b>                                          | 4   |
|        | 2.1 Addition using dot method<br>(Vedic sutras:Ekadhikenpurvena)                          |     |
|        | 2.2 Addition without carrying<br>(Vedic sutras: Purnapurnabhyam,sankalan vyavkalanabhyam) |     |

In the first year curriculum, students are allocated 25 marks in each semester for engaging in social work. This initiative involves a range of activities such as cleaning college premises, participating in Kalash Yatra, tree plantation drives, beach cleaning campaigns, organizing cultural programs, attending yoga courses, environmental awareness programs, and more. These activities aim to instill a sense of social responsibility and civic engagement among students, fostering a well-rounded educational experience that goes beyond the classroom.

### Textbooks:

|   |                                                                                                 |
|---|-------------------------------------------------------------------------------------------------|
| 1 | R.K.Jain and S.R.K.Iyengar "Advanced Engineering Mathematics", Alpha science International Ltd. |
| 2 | Advanced Engineering Mathematics, H.K Dass, S. Chand Publications                               |

### Reference Books:

|   |                                                                                          |
|---|------------------------------------------------------------------------------------------|
| 1 | Erwin Kreyszig, "Advanced Engineering Mathematics", John Wiley & Sons, Inc               |
| 2 | B.S. Grewal, "Higher Engineering Mathematics", Khanna Publication                        |
| 3 | George B. Thomas, Weir & Hass, "Thomas' Calculus", Pearson                               |
| 4 | George F. Simmons, "Differential Equations with Application", Tata Mc. Graw Hill Edition |
| 5 | Howard Anton, Chris Rorres, "Elementary Linear Algebra", Wiley Publication               |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

### Continuous Assessment:

Continuous Assessment is of 20 marks. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| Sr. No | Rubrics                                                                 | Marks    |
|--------|-------------------------------------------------------------------------|----------|
| 1      | Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC | 10 marks |
| 2      | Wins in the event/competition/hackathon                                 | 10 marks |
| 3      | Content beyond syllabus presentation                                    | 10 marks |
| 4      | Creating Proof of concept                                               | 10 marks |
| 5      | Mini Project / Extra Experiments/ Virtual Lab                           | 10 marks |

## Department of Humanities & Applied Sciences

| Course Objectives: |                                                                                                                                                                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1</b>           | The course is aimed to develop the basic skills of engineering students that are imperative for effective understanding of engineering subjects. The topics introduced will serve as basic tools for specialized studies in many fields of engineering and technology. |
| Course Outcomes:   |                                                                                                                                                                                                                                                                        |
| <b>1</b>           | Thermodynamics:-To understand basic concepts of thermodynamics & implement it on relative topics in other modules like fuel.                                                                                                                                           |
| <b>2</b>           | Water:-Analyze the quality of water and suggest suitable methods of treatment                                                                                                                                                                                          |
| <b>3</b>           | Fuel:-Explain the knowledge of determining the quality of fuel and quantify the oxygen required for combustion of fuel.                                                                                                                                                |
| <b>4</b>           | Corrosion:- Explain the concept of electrode potential and nernst theory and relate it to electrochemical cells. Identify different types of corrosion and suggest control measures in industries.                                                                     |

### Engineering Chemistry (Lab)

| R2 | Engineering Chemistry – Dara & Dara (S Chand)                      |
| R3 | A Text Book of Engineering Chemistry – Shashi Chawla (Dhanpat Rai) |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

### Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| Sr. No | Rubrics | Marks |
|--------|---------|-------|
|--------|---------|-------|

| 4  | Creating Proof of concept                                                                                                                                  | 10 marks |
| 5  | Mini Project / Extra Experiments/ Virtual Lab                                                                                                              | 10 marks |
| 6  | GATE Based Assignment test/Tutorials etc                                                                                                                   | 10 marks |
| 7  | Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes) | 05 marks |
| 8. | Multiple Choice Questions (Quiz)                                                                                                                           | 05 marks |
| 9. | Peer Review and participation the marks can be left blank (with discretion of faculty)                                                                     | 05 Marks |

### End Semester Theory Examination:

|   |                                                            |
|---|------------------------------------------------------------|
| 1 | Question paper will be of 60 marks                         |
| 2 | Question paper will have a total of five questions         |
| 3 | All questions have equal weightage and carry 20 marks each |
| 4 | Any three questions out of five needs to be solved.        |

### Engineering Chemistry (Lab)

**Suggested Experiments:** Students are required to complete at least 10 experiments.

Star (\*) marked experiments are compulsory.

| Sr. No. | Name of the Experiment                                                       |
|---------|------------------------------------------------------------------------------|
| 1       | To determine Chloride content of water by Mohr's Method.                     |
| 2       | To determine total, temporary and permanent hardness of water sample by EDTA |
| 3       | To determine metal ion concentration using a colorimeter.                    |

# Vivekanand Education Society's Institute of Technology

(Autonomous Institute Affiliated to University of Mumbai, Approved by AICTE &  
Recognized by Govt. of Maharashtra)  
NAAC accredited with 'A' Grade

## Department of Humanities & Applied Sciences

|   |                                                |
|---|------------------------------------------------|
| 4 | Synthesis of polymers                          |
| 5 | To determine the moisture content of the coal  |
| 6 | To determine the saponification number of oil. |
| 7 | To determine the acid value of the oil         |

**Note:** Suggested List of Experiments is indicative. However, flexibility lies with individual course instructor to design and introduce new, innovative and challenging experiments, (limited to maximum 30% variation to the suggested list) from within the curriculum, so that, the fundamentals and applications can be explored to give greater clarity to the students and they can be motivated to think differently.

| Term Work: |                                                                                                                                                 |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1          | Term work should consist of 10 experiments.                                                                                                     |
| 2          | The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. |
| 3          | Total 25 Marks<br>(Experiments: 15-marks, Term work Assessment: 10-marks)                                                                       |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

## Department of Humanities & Applied Sciences

### Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| Sr. No | Rubrics                                                                                                                                                    | Marks    |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 1      | Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC                                                                                    | 10 marks |
| 2      | Wins in the event/competition/hackathon                                                                                                                    | 10 marks |
| 3      | Content beyond syllabus presentation                                                                                                                       | 10 marks |
| 4      | Creating Proof of concept                                                                                                                                  | 10 marks |
| 5      | Mini Project / Extra Experiments/ Virtual Lab                                                                                                              | 10 marks |
| 6      | GATE Based Assignment test/Tutorials etc                                                                                                                   | 10 marks |
| 7      | Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes) | 05 marks |
| 8.     | Multiple Choice Questions (Quiz)                                                                                                                           | 05 marks |
| 9.     | Peer Review and participation the marks can be left blank (with discretion of faculty)                                                                     | 05 Marks |

### End Semester Theory Examination:

|   |                                                            |
|---|------------------------------------------------------------|
| 1 | Question paper will be of 60 marks                         |
| 2 | Question paper will have a total of five questions         |
| 3 | All questions have equal weightage and carry 20 marks each |
| 4 | Any three questions out of five need to be solved.         |

## Department of Humanities & Applied Sciences

|                                                                               |                                                                                                        |
|-------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| <b>Prerequisite:</b> Structured Programming Approach                          |                                                                                                        |
| <b>Lab Objective:</b>                                                         |                                                                                                        |
| 1                                                                             | To learn the basic concepts of object-oriented programming                                             |
| 2                                                                             | To study JAVA programming language                                                                     |
| 3                                                                             | To study various concepts of JAVA programming like multithreading, exception Handling, packages, etc.  |
| 4                                                                             | To explain components of GUI based programming                                                         |
| <b>Lab Outcome:</b> At the end of the course, the students should be able to: |                                                                                                        |
| 1                                                                             | Implement classes, objects, and methods effectively to encapsulate data and behavior in Java programs. |
| 2                                                                             | Efficiently use code reuse with inheritance and polymorphism concepts in Java Applications.            |
| 3                                                                             | Handle Data Objects for CRUD operations and use arrays                                                 |
| 4                                                                             | Apply the idea of Exception Handling in program and to define user defined exceptions                  |
| 5                                                                             | Design ,Create,Interact using UI and to perform events from the UI                                     |
| 6                                                                             | Perform multithreading                                                                                 |

### Object Oriented Programming Methodology - Java Programming (Theory)

| Module |     | Detailed Content                                                                                                                                                                     | Hours |
|--------|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 1      |     | <b>Introduction to Object Oriented Programming</b>                                                                                                                                   | 4     |
|        | 1.1 | OOP concepts: Objects, class, Encapsulation, Abstraction, Inheritance, Polymorphism, message passing.                                                                                |       |
|        | 1.2 | Java Virtual Machine                                                                                                                                                                 |       |
|        | 1.3 | Basic programming constructs: variables, data types, operators, unsigned right shift operator, expressions, branching and looping.                                                   |       |
| 2      |     | <b>Class, Object, Packages and Input/output</b>                                                                                                                                      | 10    |
|        | 2.1 | Class, object, data members, member functions, Constructors, types, static members and functions, Packages in java, types, user defined packages, Input and output functions in Java |       |
|        | 2.2 | Array, Strings, String Buffer, Vectors                                                                                                                                               |       |
| 3      |     | <b>Inheritance and Interface</b>                                                                                                                                                     | 8     |
|        | 3.1 | Types of inheritance, Method overriding, super, abstract class and abstract                                                                                                          |       |

### Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2) Mid Term test is to be conducted when approx. 50% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

### Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| Sr. No | Rubrics | Marks |
|--------|---------|-------|
|--------|---------|-------|

| 2  | Wins in the event/competition/hackathon                                                                                                                    | 10 marks |
| 3  | Content beyond syllabus presentation                                                                                                                       | 10 marks |
| 4  | Creating Proof of concept                                                                                                                                  | 10 marks |
| 5  | Mini Project / Extra Experiments/ Virtual Lab                                                                                                              | 10 marks |
| 6  | GATE Based Assignment test/Tutorials etc                                                                                                                   | 10 marks |
| 7  | Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes) | 05 marks |
| 8. | Multiple Choice Questions (Quiz)                                                                                                                           | 05 marks |
| 9. | Peer Review and participation the marks can be left blank (with discretion of faculty)                                                                     | 05 Marks |

### End Semester Theory Examination:

|   |                                                            |
|---|------------------------------------------------------------|
| 1 | Question paper will be of 60 marks                         |
| 2 | Question paper will have a total of five questions         |
| 3 | All questions have equal weightage and carry 20 marks each |
| 4 | Any three questions out of five need to be solved.         |

### Object Oriented Programming Methodology - Java Programming(Lab)

**Suggested Experiments:** Students are required to complete at least 10 experiments.

Star (\*) marked experiments are compulsory.

| Sr. No. | Name of the Experiment                                                                             |
|---------|----------------------------------------------------------------------------------------------------|
| 1       | Implementing Classes and Objects for a scenario using object arrays.                               |
| 2       | Implementing Interactive Object Creation: Empowering Users to Generate Objects using Scanner Class |
| 3       | Implementing polymorphism using Method and Constructor for String Manipulation in Java             |
| 4       | Implementing Inheritance and Interfaces for a scenario.                                            |
| 5       | Implementation of Abstract Class and Abstract Method for a scenario.                               |

# Vivekanand Education Society's Institute of Technology

(Autonomous Institute Affiliated to University of Mumbai, Approved by AICTE &  
Recognized by Govt. of Maharashtra)  
NAAC accredited with 'A' Grade

## Department of Humanities & Applied Sciences

|    |                                                                                                       |
|----|-------------------------------------------------------------------------------------------------------|
| 6  | Implementing JSON File Handling in Java to implement Create, Display, Update and Delete data objects. |
| 7  | Handling data with 2D arrays and ArrayList                                                            |
| 8  | Implement Exception Handling with User Defined Exception                                              |
| 9  | Implementing Swing and AWT for creating UI                                                            |
| 10 | Implementing a class for performing Interaction of UI with JSON data Files.                           |
| 11 | Implementing Action Listeners for UI                                                                  |
| 12 | Implementing Multithreading in Java for a File Processing                                             |

**Note:** Suggested List of Experiments is indicative. However, flexibilities lie with individual course instructor to design and introduce new, innovative and challenging experiments, (limited to maximum 30% variation to the suggested list) from within the curriculum, so that, the fundamentals and applications can be explored to give greater clarity to the students and they can be motivated to think differently.

| Term Work: |                                                                                                                                                 |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1          | Term work should consist of 10 experiments.                                                                                                     |
| 2          | The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. |
| 3          | Total 25 Marks<br>(Experiments: 15-marks, Term work Assessment: 10-marks)                                                                       |

## Department of Humanities & Applied Sciences

| Course Objectives: |                                                                                                                 |
|--------------------|-----------------------------------------------------------------------------------------------------------------|
| 1                  | To have an understanding of the basic structure and operation of basic digital circuits and a digital computer. |
| 2                  | To discuss in detail arithmetic operations in digital systems.                                                  |
| 3                  | To discuss processor organization along with functions of control unit devices.                                 |
| 4                  | To study the memory hierarchy and principles of advanced computing.                                             |
| Course Outcomes:   |                                                                                                                 |
| 1                  | To learn different number systems, arithmetic operations and the basics of digital logic.                       |
| 2                  | To demonstrate combinational circuits.                                                                          |
| 3                  | To demonstrate sequential circuits.                                                                             |
| 4                  | To understand the basics of processor organization and architecture.                                            |
| 5                  | To understand the concept of a control unit.                                                                    |
| 6                  | To demonstrate the memory organization.                                                                         |

| 4       | Wins in the event/competition/hackathon pertaining to the course                                                                     | 10    |
| 5       | Case study, Presentation, group discussion, technical debate on recent trends in the said course                                     | 10    |
| 6       | Project-based Learning and evaluation / Extra assignment / Question paper solution                                                   | 10    |
| 7       | NPTEL/ Coursera/ Udemy/any MOOC Certificate course for 4 weeks                                                                       | 10    |
| 8       | Content beyond syllabus presentation                                                                                                 | 10    |
| 9       | Creating Proof of Concept                                                                                                            | 10    |
| 10      | Mini Project / Extra Experiments/ Virtual Lab                                                                                        | 10    |
| 11      | GATE Based on Assignment tests/Tutorials etc                                                                                         | 10    |
| 12      | Peer Review and participation                                                                                                        | 5/10  |

\*For sr.no.7, the date of the certification exam should be within the term, and in case a student is unable to complete the certification, the grading has to be done accordingly.

### Indirect Assessment

|   |                               |
|---|-------------------------------|
| 1 | Mock Viva/Practical           |
| 2 | Skill Enhancement Lecture     |
| 3 | Extra Assignments/lab/lecture |

### End Semester Theory Examination

|   |                                                            |
|---|------------------------------------------------------------|
| 1 | Question paper will be of 60 marks                         |
| 2 | Question paper will have a total of five questions         |
| 3 | All questions have equal weightage and carry 20 marks each |
| 4 | Any three questions out of five need to be solved.         |

## Department of Humanities & Applied Sciences

| Course Objectives: |                                                                                                                    |
|--------------------|--------------------------------------------------------------------------------------------------------------------|
| 1                  | To demonstrate the fundamental concepts of interpersonal and professional communication.                           |
| 2                  | To encourage active listening with focus on content, purpose, ideas and tone.                                      |
| 3                  | To facilitate fluent speaking skills in social, academic and professional situations                               |
| 4                  | To train in reading strategies for comprehending academic and business correspondence.                             |
| 5                  | To promote effective writing skills in business, technology and academic arenas.                                   |
| 6                  | To inculcate confident personality traits along with grooming and social etiquettes.                               |
| Course Outcomes:   |                                                                                                                    |
| 1                  | Eliminate barriers and use verbal/non-verbal cues at social and workplace situations.                              |
| 2                  | Employ listening strategies to comprehend wide-ranging vocabulary, grammatical structures, tone and pronunciation. |
| 3                  | Prepare effectively for speaking at social, academic and business situations.                                      |
| 4                  | Use reading strategies for faster comprehension, summarization and evaluation of texts.                            |
| 5                  | Acquire effective writing skills for drafting academic, business and technical documents.                          |
| 6                  | Successfully interact in all kinds of settings, displaying refined grooming and social skills.                     |

### Mode of Conduction

Lectures hours are to be used for interactive discussion, placing the proposals about the topics at hand and motivating students to reflect, explore and verify them.

practice sessions for analyzing and discussing the topic, help the students explore the important or critical elements.

### Continuous Assessment:

# Vivekanand Education Society's Institute of Technology

(Autonomous Institute Affiliated to University of Mumbai, Approved by AICTE &  
Recognized by Govt. of Maharashtra)  
NAAC accredited with 'A' Grade

## Department of Humanities & Applied Sciences

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

| Sr. No | Rubrics                                                                                                                                                    | Marks    |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 1      | Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC                                                                                    | 10 marks |
| 2      | Wins in the event/competition/hackathon                                                                                                                    | 10 marks |
| 3      | Content beyond syllabus presentation                                                                                                                       | 10 marks |
| 4      | Creating Proof of concept                                                                                                                                  | 10 marks |
| 5      | Mini Project / Extra Experiments/ Virtual Lab                                                                                                              | 10 marks |
| 6      | GATE Based Assignment test/Tutorials etc                                                                                                                   | 10 marks |
| 7      | Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes) | 05 marks |
| 8.     | Multiple Choice Questions (Quiz)                                                                                                                           | 05 marks |
| 9.     | Peer Review and participation the marks can be left blank (with discretion of faculty)                                                                     | 05 Marks |

In the first year curriculum, students are allocated 25 marks in each semester for engaging in social work. This initiative involves a range of activities such as cleaning college premises, participating in Kalash Yatra, tree plantation drives, beach cleaning campaigns, organizing cultural programs, attending yoga courses, environmental awareness programs, and more. These activities aim to instill a sense of social responsibility and civic engagement among students, fostering a well-rounded educational experience that goes beyond the classroom.
