Criteria 1.3 : Curriculum Enrichment

Department of Information Technology

1.3.3 Percentage of students undertaking project work/ field work/ internships (Data for the latest completed academic year) -2021-22

- **Number of students undertaking Project Work in their Final Year of Information Technology =73**
- **Number of students undertaking Mini Project in First,Second & Third Year Levels in UG Programme = 129+140+140= 409**
- **Number of Students undertaking Internship =22**
- **Total No.of Students enrolled in 2021-22 in Information Technology = 482**

Formula:

$$\frac{\text{Number of students undertaking project work /field work / internships}}{\text{Total number of students}} \times 100$$

- **Percentage of Students Undertaking Project Work/Field Work/Internships = (409+73)/482 = 100 %**

SUB: INTERNSHIP COMPLETION LETTER

We are glad to inform you that **Mr. CHIRAG HARI CHAWLA** with Intern ID – **THPYJU107**, has successfully completed internship at Trivia Software's for the role of ***"Python Developer Intern"*** from 8th Jun 2022 to 8th Jul 2022.

During the internship, the candidate was exposed to the various Python 3.x related technologies and also implemented Management System Design Project using

- tkinter for GUI
- PDBC using SQLite3
- Data Science (Extraction, Analysis & Visualization)

We found the candidate extremely inquisitive and hardworking. The candidate had dedicated **4 hours daily** into working on the problem statement. The candidate was very much interested to learn the Python functionalities and implement it in the project too.

Association of candidate with us was very fruitful and we wish all the best for future endeavors.

1.3 Objectives of the project

The objective of this project is to organize the medical store details like stocks, medicines, expense, sales and others. The medical store management system is developed as application program for reducing manual work managing medical store.

- Provides the searching facilities based on various factors such as employee id, company, customers, medicine and sales.
- It tracks all the information of Stocks, medicines, sells etc.
- All the fields such has company, customers, medicines are validated and does not take invalid values.
- To show the description and information of the stocks and others.
- Editing, Adding, deleting of the records can be done in this application.
- To monitor the information regarding the transaction of the sales.

1.4Scope

- This system makes it simple to manage and organise the details of medicines available in medical stores.
- The medical store management system also assists in keeping track of available medicine supply and ensuring that it is updated on a regular basis.
- This project also allows for the storage of supplier (i.e. Company) information as well as the stocks they provide.
- The medical store management system also allows clients to receive automatically generated bills.
- This project can also be used to handle the customer and staff databases.
- The design of a medical shop management system reduces the time required keeping records and monitoring stock payments.

Project_4: NASEOH PLACEMENT MANAGER

Collaboration with: NASEOH

Problem Statement:

To make an app for an NGO which has disabled students. The app should focus on managing the placement procedure, get information about the incoming companies, and records of the students placed.

Solution:

Our proposed system provides the user multiple additional functionalities in addition to a basic placement management system which ensures the ease in various tasks that needed to be done manually previously. It is a customised system that is designed specially as per the need of the placement department of an NGO. Our proposed system allows users to register the candidates, print the filled registration forms, search or view and update student/candidate records, company records as well as records of currently available placement offers in addition to other features . Along with these some special features that our system offers are:

- Searching tables over multiple criteria.
- Generating an excel.
- A special feedback feature that has feedback about students from NGO, companies and the students themselves.
- Adding Excel data to the system.
- Generating a PDF.

Current Status:

Last demo for the confirmation of deployment is to be given.

Project Mentors:

Dr. Shanta Sondur
Prof. Charusheela Nehete

1. Introduction

1.1 Introduction

Medicines are one of the most essential aspects in curing a person's illness.
As a result, in today's world, the availability of medicines and keeping track of them has Become critical. The smooth and appropriate running of the medical stores department determines the effectiveness and efficiency of healthcare delivery in a hospital or anywhere else in the world. We'll need a good application to assist us sort things out in order to complete this challenging task. This project consists of a desktop application which allows the store's administrator to keep track of and manage all of the medical shop's activity.

1.2 Problem Statement

Employees, companies, customers, medicines, sales are all tracked in the medical inventory database. Each employee's name, unique id, address, contact and email address are all stored in the database. Employees are given responsibilities and one of them is given the admin role which allows him to manage the database. The admin has the authority to purchase medicines from companies. The purchase is made from database of multiple companies each with its own unique company id, name, address, phone number and email address. The admin updates each medicine to the database with a unique medicine id, name, content, quantity, amount and expiry date. As the pharmaceuticals database is updated, the admin can manage and start sales records using a unique sales id, type, quantity, amount and date. Customers who have a unique id, name, address, contact and email details stored in the database purchases medicines. The admin has the authority to make changes to the database as needed, such as adding new entries for companies, sales, employees, customers and medicines stocks or deleting or editing.
existing records as needed.

1.3 Objectives of the project

The objective of this project is to organize the medical store details like stocks, medicines, expense, sales and others. The medical store management system is developed as application program for reducing manual work managing medical store.

- Provides the searching facilities based on various factors such as employee id, company, customers, medicine and sales.
- It tracks all the information of Stocks, medicines, sells etc.
- All the fields such has company, customers, medicines are validated and does not take invalid values.
- To show the description and information of the stocks and others.
- Editing, Adding, deleting of the records can be done in this application.
- To monitor the information regarding the transaction of the sales.

1.4Scope

- This system makes it simple to manage and organise the details of medicines available in medical stores.
- The medical store management system also assists in keeping track of available medicine supply and ensuring that it is updated on a regular basis.
- This project also allows for the storage of supplier (i.e. Company) information as well as the stocks they provide.
- The medical store management system also allows clients to receive automatically generated bills.
- This project can also be used to handle the customer and staff databases.
- The design of a medical shop management system reduces the time required keeping records and monitoring stock payments.
