Prepared By

Dr. Rohini Temkar,

Assistant Professor, Department of Computer Engineering,

SPOC, SIH 2022.

Grand Finale-Smart India Hackathon 2022

Smart India Hackathon (SIH) is a nationwide initiative by the Ministry of Education's Innovation Cell to provide students a platform to solve the pressing problems of the government, ministries, departments, industries and other organizations. SIH has been acclaimed as the world's biggest open innovation model and it inculcates the culture of product innovation and problem-solving among students. SIH is conducted every year since 2017 in two formats i.e. SIH Software and SIH Hardware Editions for higher education students. Smart India Hackathon 2022 software grand finale was scheduled from 25th August to 26th August 2022. Smart India hackathon has witnessed huge participation from Ministries, departments, PSUs, and private organizations in providing problem statements. SIH 2022 has offered 459 Software problem statements and 104 hardware problem statements.

Glorious Success of VESITians

It is a moment of pride that we have added on to the winning history of VESIT, that 4 out of 4 teams have won the Grand Finale of Smart India Hackathon 2022.

6. Abstract of the project

The solution should analyze the caller's voice on live ongoing calls being attended by the caller in the Emergency Response System. After analyzing the voice of the caller, the solution should predict the emotional/ mental condition of the caller. The solution should predict/suggest the following about the caller Stressful Voice Drunk Voice Prank Voice Abusive Voice Painful Voice Or any mental condition.

7. Evaluation process

Mentoring Round 1: The judges familiarized us with the problem statements and had given us their expectations with respect to the problem statement. We were allowed to ask any questions regarding the same.

Evaluation Round 1: We showed the prototype of our solution to the judges and explained our solution for the given problem statement. Judges suggested that we should work on improving the performance of our ML model.

Mentoring Round 2: We showed the changes suggested in the previous round. In this round, we were suggested to work on detecting the noises in the surrounding that happen during live calls.

Evaluation Round 2: We completed the suggested work and along with that our web application was also ready. We showed our dashboard to the judges along with the improvements in the ML model and the noise detection module. In this round judges suggested working on presenting trend analysis on the dashboard.

Power Mentoring: This round was the extension of the previous round where judges evaluated our work on the previous suggestions.

Power Judging Round: This was the final round wherein we showed the live demo of our end-to-end solution with a live call and answered the queries presented by the Judges.

Name of the Gadget / Equipment: Ultrasonic Levitator					
Principle of Operation: suspending matter in the air against gravity using acoustic radiation pressure from high intensity sound waves.					
Scientific Laws Applicable: 1) Law of gravitation 2) Oscillation 3) Superposition of waves to create standing waves					
Engineering and Technological Aspects: Particles are trapped at the nodes of a standing wave, formed by either a sound source and reflector or two sets of sources. Typically sound waves at ultrasonic frequencies are used thus creating no sound audible to humans. This is primarily due to the high intensity of sound required to counteract gravity.					
Future Trends (Creativity/Innovation / Imagination): 1) Ultrasonic levitation is a promising method for containerless processing of microchips and other small, delicate objects in industry. 2) Containerless processing may also be used for applications requiring very-high-purity materials or chemical reactions too vigorous to happen in a container.					
Domain: Physics/ BEE (You may select more than one domain if applicable)					

Sample Synopsis

Awakening The Scientist (ATS) Report

In order to become a professional and remain competitive in this highly commercial world one has to master the art of working in groups and teams along with sound knowledge of the field. Having a good balance of team work along with technical knowledge cannot be developed overnight and requires an attitude of sharing and caring.

The rapid changes in the technology is due to the application of discoveries and inventions in the basic science domain. We need to be observant as to how basic science makes a difference in our day to day life.

Awakening the Scientist is an opportunity given to the First year students to take the first step in this transformation of a student to a professional. First year students make groups and each

Vivekanand Education Society's Institute of Technology

group identifies the basic engineering and technology used in equipment, gadgets and tools used in day to day life. The group will have to relate to the past, present and future of the technology used. Because of covid restrictions, the mode of conduction was online this year. This year , 19 groups with total number of students as approximately 66 had registered for this event during 2022-23. The groups then gave a ten minute presentation on the same. There was an elimination round from which 8 groups were selected for finals.

AY 2022-23

Event description: Workshop on Robotics and Automation systems, Organized by VESIT-AIA CDC, Dept of Automation and Robotics, Supported by Hempronics Systems Pvt. Ltd & B&R Industrial Automation Pvt. Ltd, In association with Advanced Training Cell (ATC)

Workshop exposed students to building blocks in Robotics and Automation. Workshop covered sensors, pneumatic components/systems, Programmable Logic Controllers, Drives, Actuators, etc used in Robotics and Automation. Theoretical lectures and practical hands on sessions were conducted to infuse inclusive knowledge of development and deployment system. This 54 hour add on course gives more weightage to hands on training on the various kits specially developed in collaboration with industries such as Pepperl+Fuchs, Festo, B&R Automation, Rockwell Automation, Siemens, among others. Hands on session are conducted by experts working with System Integrators and OEMs.

Joint certificate by VESIT-AIA CDC and Hempronics Systems Pvt. Ltd are awarded to students on successful completion of workshop and satisfactory performance in end of workshop test.

React Bootcamp Report

In Association with

VESIT - IIC (Institute Innovation Council)

&

VESIT - IQAC (Institute Quality Assurance Cell)

“The hallmark of successful people is that there are always stretching themselves to learn new things.”

The quote by Carol S.Dweck spoke volumes this August(1,2,3,4,8,10,17,22,23)when students from VESIT decided to attend a workshop regarding React by Codecell. The offline event that covered a plethora of topics was held from 3 PM to 5 PM for the students to improve their skill set.

The speakers for the event were:

- Pranav Ubharande of D12A
- Japneet Rjput of D12C

The event started off with Pranav Ubharande explaining what is react. He further explained the installation process of react. Students were intrigued by this new and amazing framework

Vivekanand Education Society's Institute of Technology

(Affiliated to University of Mumbai, Approved by AICTE & Recognized by Govt. of Maharashtra)

which is composable, reusable and one of the most efficient frontend development frameworks. He further explained java script and jsx.

The next few days there was hands on coding and simultaneous interaction with the students. Topics such as Functional and Class Components, Props, States, Conditional rendering, List rendering, List keys(in- dex antipattern), css insertion, Life- cycle Methods were covered.

The second half of this session was taken by Japneet Rajput who explained the concept of hooks in React (useState, useEffect, useContext, useReducer, useCallback, useMemo etc.)

The session was concluded with students who were thorough with the concepts of React and were able to do self learning projects of their own.

Qualitative Feedback about the event:

Amazing Session!!!!

I Learned a lot...Thank You so much !!! 😊.

Looking forward to many such sessions.

Very informative session.Enjoyed a lot.

CN EXPERIMENT 9(B)

AIM :
IPv4 addressing from http://vlabs.iitb.ac.in/vlabs-dev/labs/computer_network/labs/exp4/index.php

THEORY :

The main purpose of this experiment is to give IP Address of different classes in given Network id. The goal of the experiment is to learn the concept of IP Addressing and let them manually set up IP address in the given network and check for the same.

IP addresses enable computers to communicate by providing unique identifiers for the computer itself and for the network over which it is located. An IP address is a 32 bit value that contains a network identifier (net -id) and a host identifier (host-id).

The network administrators need to assign IP addresses to the system on their network. This address needs to be a unique one. All the computers on a particular subnet will have the same network identifier but different host identifiers. The Internet Assigned Numbers Authority (IANA) assigns network identifiers to avoid any duplication of addresses.

Host Identifier Network Identifier 32 bits

The 32 bit IPv4 address is grouped into groups of eight bits, separated by dots. Each 8 bit group is then converted into its equivalent binary number. Thus each octet (8bit) can take value from 0 to 255. The IPv4 in the dotted decimal notation can range from 0.0.0.0 to 255.255.255.255.

IPv4 Address are classified into 5 types as follows:

1. Class A
2. Class B
3. Class C
4. Class D
5. Class E

Class A

The first bit of the first octet is always set to 0 (zero). Thus the first octet ranges from 1-127 i.e. 00000000 - 01111111

1-127

Sample-Experiment Journal

Vivekanand Education Society's Institute of Technology

Class A addresses only include IP starting from 1.x.x.x to 126.x.x.x only. The IP range 127.x.x.x is reserved for loopback IP addresses. The default subnet mask for class Class A IP address is 255.0.0.0 which implies that Class A addressing can have 126 networks and 16777214 hosts. Class A IP address format is thus : 0NNNNNNN.HHHHHHHH.HHHHHHHH.HHHHHHHH

Class B

An IP address which belongs to class B has the first two bits in the first octet set to 10, i.e.

10000000 - 10111111

128 - 191

Class B IP Addresses range from 128.0.x.x to 191.255.x.x. The default subnet mask for Class B is 255.255.x.x. Class B has 16384 Network addresses and 65534 Host addresses. Class B IP addresses format is : 10NNNNNN.NNNNNNNN.HHHHHHHH.HHHHHHHH

Class C

The first octet of Class C IP address has its first 3 bits set to 110, that is:

11000000 - 11011111

192 - 223

Class C IP addresses range from 192.0.0.x to 223.255.255.x. The default subnet mask for Class C is 255.255.255.x. Class C gives 2097152 Network addresses and 254 Host addresses. Class C IP address format is : 110NNNNN.NNNNNNNN.NNNNNNNN.HHHHHHHH

PROCEDURE :

- The aim is to Give IP Addresses to the PCs.
- To perform the experiment follow the below steps.
- A choice list would be given defining the Classes.
- The user has to select the class in which they choose to give IP Addresses.
- After that a Network ID would be given and the user has to enter the IP Addresses according to the Network ID.
- Click on submit to test whether the IP address given to PCs make them into Network or not.

CONCLUSION :

In this manner, the simulation is executed and demonstrated properly. When the proper addresses are assigned to all the PCs, the output is shown that all the PCs are in network.

If the IP address or the subnet mask is incorrect then it is shown (for that particular PC) that it is not in network. Hence, the concept of valid IP addresses is understood thoroughly.

Detailed Report

VESIT's Best Practice – Looking Beyond Syllabus – is an intra-collegiate year-long technical project competition to encourage, nourish and enrich our students of SE, TE, BE, and FE students of MCA with the boundaries of emerging technology domains relevant to them every year. Each year we witness a footfall of about 3500 students visiting the project competition. This activity is strategically designed in terms of planning, implementation and continuous improvement by mapping of problem statements with United Nations Sustainable Development Goals.

The aim is to expose the students to emerging technologies and opportunities to work as teams on multidisciplinary projects under the mentorship of a faculty member assigned to them. This year we organized a two-day hardware and software hackathon- LBS I2I COMPETITION 2022-23 on the 13th and 14th of March 2023 in our premises.

The **LBS I2I COMPETITION 2022-23** is committed to encouraging creativity, diversity, and networking among aspiring programmers. We will host young engineers for a demanding 24-hour event during which they will create projects on the hardware and software tracks. This hackathon attempts to establish a friendly and encouraging environment where everyone can learn, develop, and invent.

Rubrics for Evaluation:

- Direct relevance to the core problem/addressing the core problem to the society;
- Uniqueness of the proposed solution;
- Ease of implementation (e.g. feasibility of implementation of the idea within 6 months).
- Communication and presentation skills.

Result of the competition was declared on 16th March 2023 and the winning teams were felicitated at the annual prize distribution ceremony of the college on 17th **March, 2023**.

Abstract—In the CMS experiment at CERN, Geneva, a large number of HGCAL sensor modules are fabricated in advanced laboratories around the world. Each sensor module contains about 700 checkpoints for visual inspection thus making it almost impossible to carry out such inspection manually. As artificial intelligence is more and more widely used in manufacturing, traditional detection technologies are gradually being intelligent. In order to more accurately evaluate the checkpoints, we propose to use deep learning-based object detection techniques to detect manufacturing defects in testing large numbers of modules automatically.

Index Terms—Automated visual inspection, CMS, Object Detection, CMM, Yolov4-tiny, VGG16.

I. INTRODUCTION

CERN's Large Hadron Collider (LHC)[1] is the most powerful and largest particle accelerator. It accelerates protons to nearly the speed of light in clockwise and anti-clockwise directions. It collides them at four different locations situated around its ring. It was designed to explore the miscellaneous

When comparing manual and automatic visual inspection (AVI) [2,3], AVI saves time for human inspectors. Manual inspection is time-consuming and expensive process which

11. Skill Enhancement Lecture (SEL)

All round development, a desire to expand one's horizons, and a commitment to excellence is inculcated in the students of VESIT in a disciplined environment ensuring a strong foundation. To achieve this institute arranges expert lectures Skill Enhancement Lectures (SEL) from industry/institute. Skill Enhancement Lectures (SEL) are arranged by the Subject Teachers for their respective subject during the Semester. Each Subject Teacher must arrange at least two such sessions (i.e, Lectures, Workshops etc...) per Semester that pertains to Content Beyond Syllabus. Each individual Faculty initiates the process of inviting Experts from Industry / renowned Institutes like BARC, TIFR, IIT, CDAC etc.

After each such session, the Subject Teacher fully documents the event and evaluates the Student Feedback.

SEL AY 22-23

1. An expert session on **SaaS Applications for "Internet of the Future"** was conducted by Mr. Subodh Gajare, Senior Principal Architect Cisco R&D Bangalore on 28th July 2022 for third year students for the Computer Networks.
2. An expert session on **"Innovation Techniques - Combating Financial Crimes using AI & ML"** was conducted by Mr. Mustafa Fatakdawala, Senior Financial Crime Specialist on 13th March 2023 for third year students for the subject Artificial Intelligence.
3. An expert session on **"Leveraging Innovative Development through Augmented Research"** was conducted by Mr. Arnav Neel Ghosh, Strategic Advisor - Growth - International Markets, Parallax on 13th March 2023 for third year students for the subject Cloud Computing.
4. An expert session on **"Recent Trends in Mobile Computing"** was conducted by Dr. Munir Sayyad, Asst. Vice President at reliance Jio on 11th April 2023 for third year students for the subject Mobile Computing.
5. An expert session on **"Digital Marketing & Social media marketing"** was conducted by Mr. Sivaramakrishna Palodi . Trainer unacademy on 13th April 2023 for third year students for Social Media analytics.

12. E-yantra/Project competitions

E-Yantra Innovation Challenge (formerly known as EYantra Ideas Competition) is a competition to encourage innovative projects from robotics labs set up through the e-Yantra Lab Setup Initiative (eLSI) in colleges across the world.

India's biggest Project Based Learning robotics competitions- the E Yantra Robotics (EYRC) hosted by e-Yantra. Provides a platform to encourage innovative projects from robotics labs set up through the e-yantra Lab Setup Initiative(eLSI). Also students are encouraged to participate and compete in different project competitions.

Pradarshini'23

Glimpse- Pradarshan'23

The Department of Computer Engineering celebrated Technology Day (20th March 2023) as Department Day. Following activities were conducted on Department Day.

Pradarshini' 23 :

The Department of Computer Engineering in association with VESIT- IIC & VESIT IQAC organized **Pradarshini '23** on 20th March 2023. Pradarshini'23 is a platform and one of the Best practices and Distinctiveness (Peer to Peer Learning) of the Computer Engineering department in which the Second Year (SE), the Third year (TE) and the Final year (BE) students exhibit the project work. It helps to enhance the Presentation Skills of the students. While exhibition visitors visit each project desk, the feedback of visitors helps them to provide research insights and better innovative ideas. Exhibition aims for peer to peer learning. The projects are being presented by Final year and third year Students and visited by their seniors, batchmates and juniors. Hence it contributes to Inspiration, Motivation and learning for Peers.

Technology Day “PROJECT EXHIBITION” was organized by the Department of Information Technology, on 20th March 2023 from 10:30 am onwards. Selected Best 12 BE project groups participation in this exhibition for Final Year IT class.

Major objective of organizing this exhibition was to provide the platform and unleash the potential of the students by showcasing their innovative projects developed in the Final Year either as Industry Defined Problem or User Defined Problem and provide an opportunity for the students to demonstrate their learning experience.

The outcome of the PROJECT EXHIBITION was that students were able to show their project at a higher level and the process boosted their confidence.

The inaugural of the project exhibition witnessed the presence of Mr. Harish Mehta (Founder and Executive Chairman of Onward Technologies Ltd, First elected Chairman of NASSCOM) and Mr. Vijay Talreja (VESIT Alumni, Senior Vice President - Apexon, Co-Founder & Director - Adapty, Co-Founder & Advisor - Bynocs, Member Board Of Trustees - VESIT, Lead Investor - Neev Angels) and Dr. Jayalakshmi Nair, principal, VESIT, along with the faculty and staff members of Department of IT, VESIT

14. Language Lab Activities for Advanced Learners (VESLit)

VESLit Circle, an extension of the language lab, started out some years back with the intention of enhancing literary creativity and to foster a love for language. Under the guidance of their staff incharges, the newly constituted council of 2018-19, with a lot of enthusiasm and energy, marched on with these agendas in mind. Lots of activities are conducted for advanced learners under this VESLit circle.

D. Proof for Activities for slow learners (Under graduate students)

1. Case Study:

AY 2022-23

Department of Computer Engineering

- **Strategies given by IQAC team:**

- a. Self-learning material could be prepared- as a Slow learner student finds it difficult to catch up to a fast/advanced learner and may hesitate to ask questions in the class.
- b. One topic/per subject basic fundamental notes can be prepared and shared with them.
- c. Questionnaires' based on the write-up can be given to judge their knowledge.
- d. The discussion was also on how to identify slow learners (based on 12th marks or IA marks total performance based on class test/ final test).
- e. A small assignment should be given and they must be encouraged to read the topic in the library(study, submit the assignment and attach the footprint may be a pic or a selfie that they visited the library)
- f. NPTEL, Coursera / small YouTube videos of 5-10 minutes can be shown to the students.
- g. Peer-to-peer learning/mentor-mentee buddy meetings can be taken.

It was decided that out of these activities, Subject teachers are expected to implement “a” and “e” for identified slow learners and generate a “Slow-Learner-Assessment Report”. The report should include the improvement in the conceptual understanding of the topic by way of question answer/oral/practical implementation.

- **Identification of Students:**

The set of students having Internal KT in **Three** subjects were identified as slow learners by PAC.

Third year: Aditya Khetwani 2020.aaditya.khetwani@ves.ac.in,

Strategies	Strategies Discussed	Action Taken	Impact
a)	Self-learning material could be prepared- as a Slow learner student finds it difficult to catch up to a fast/advanced learner and may hesitate to ask questions in the class.	Respective faculties have shared their respective subjects' learning materials and advise students to prepare their own learning material out of it.	Students have Prepared their own learning materials
b)	Questionnaires' based on the write-up can be given to judge their knowledge.	Respective faculties have prepared Assignments , Quiz	Based on the material shared respective faculties have evaluated on different parameters like Quiz , Assignment etc
e)	A small assignment should be given and they must be encouraged to read the topic in the library(study, submit the assignment and attach the footprint may be a pic or a selfie that they visited the library)	The identified Students as a slow learner were advised & sent to the library to prepare the respective subjects.	The Impact can be seen in the result of IAT2 where marks are improved as compared to IAT1
f)	NPTEL, Coursera / small YouTube videos of 5-10 minutes can be shown to the students.	Shared the links for respective subjects	The videos benefits them to understand the concept more clearly & impact can be seen in IAT2 results

Dear Students,

You are requested to meet your respective **Faculty Advisor (Mentor)** by next week. Your faculty advisor will take a meeting with you to discuss your academics, various activities held in college/department, general issues if any etc...

Mentoring is a developmental, caring, sharing, and helping relationship where one person invests time, know-how and effort in enhancing another person's career growth, knowledge and skills.

Mentor-Mentee list is attached herewith for your reference.

Regards,
Mr. Yogesh Pandit

Mentoring meeting record sheet

Date:- 22/08/22 & 26/08/2022

Name of Mentor:- Mrs. Gauri Sahoo

Agenda of the Meeting:-

Academic, Projects, Extra curricular, Exams, Personal, Medical Issues, Fees Related etc.

Issues raised by Mentee/s:

1. After the lectures till what time students can sit in the lab for projects/studies ?
2. How to get information regarding students' attendance?
3. What is the schedule of Internal Assessment 2 ?
4. Improvement needed in college wifi.
5. What to do if the Internal Test and placement interview are scheduled on the same day ?

Advice/Suggestions given by Mentor :

1. In the ETRX Dept lab, but in the presence of lab Assistant and Lab incharges .
2. Get information from the respective class teacher.
3. IA 2 will commence from 13th october and end on 17th october.
4. The issue will be discussed with the concerned authority.
5. Please inform the Examination Incharge of ETRX Dept about this issue.

Dear Students,

A 'Finishing School' Activity is scheduled on **15th July 2022 (Friday)**.

The subjects/topics covered in the activity will be:

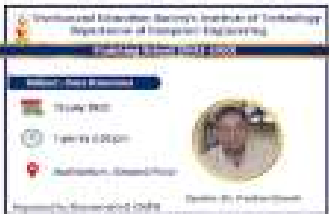

- 1) Data Structures by Dr. Prashant Kanade from 1 PM to 2:30 PM.
- 2) Database Management System by Mrs. Sunita Sahu from 2:45 PM to 4:15 PM.

Venue: Auditorium, Ground Floor.

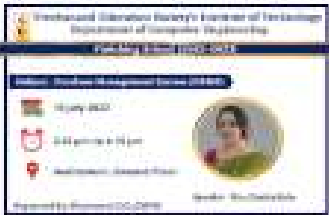

Kindly be present in the auditorium 10 min before the scheduled time.

Warm Regards,

Report

Topic : Finishing School (Data Structures)

Name of the Speaker : Prof. Dr. Prashant Kanade

Class: D12A, D12B, D12C

Date: 15-07-2022 Time: 1.00 PM to 2.30 PM

Mode of Conduction: Offline (VESIT Auditorium)

Brief about the session:

1. Professor Dr. Prashant Kanade Sir detailed on the necessary topics from Data Structures to be focussed on for the placements .
2. Sir , gave the brief explanation on different data structures , their implementation , complexity and related problem statements as examples that may be asked during placements.
3. Sir also discussed about different types of searching and sorting techniques and solved all the doubts relative to the subject . He also shared the references for the same.

6. Project Group formation

AY 2022-23

Department of Information Technology

BE Project Group Formation

The group formation for BE Project (Semester 7 and Semester 8) is initiated at the end of Semester 6. The students are given a choice to form their project group and select project group members. Along with this choice, the students also submit their area of interest and their CGPA.

The groups are formed taking into consideration their choice and CGPA (such a manner that the average CGPA of all the groups are the same) by a panel of senior faculty members. The mentors are also allocated to the group depending on the area of interest provided by the students and area of interest and expertise of the faculty members.

The group formation is announced to the students and faculty members by the end of

Semester 6. The groups are asked to coordinate with the mentor to decide and collaborate about the projects.

SE/TE Mini-Project Group Formation

The group formation for SE/TE Project (Semester 3 to Semester 6) is initiated at the start of each semester. The students are given a choice to form their project group and select project group members. Along with this choice, the students also submit their topic/problem domain. The groups are formed taking into consideration their choice by a panel of senior faculty members.

The mentors are also allocated to the group depending on the domain provided by the students and expertise of the faculty members.

The group formation is announced to the students and faculty members by the third week of the start of each Semester. The groups are asked to coordinate with the mentor to decide and collaborate about the projects.
