CONTENTS

From the Professor's Desk

Enhancing the quality of education is the prime task in our department. It helps us to build society of our dreams. With demography of young in age and in sprit, we, the staff, always ensure the quality education which is rich in values and modern in content. The mirrored reflection was showcased by our students this semester through their brilliant performance in academics and extracurricular activities in equal proportions. Their over-the-edge win in Praxis shows the perfect mix of all ingredients to be successful.Lets continue with the same zest and high spirits to deliver something extra that makes ordinary as extraordinary.

Thanks and

ALUMNI VOICE

Our department has always been known as the "coolest" one in VESIT. The four years I spent her will always be one of the highs of my life. The journey of becoming an engineer was more beautiful than the destination itself, all thanks to our department. Everyone who has been a part of our department- our professors, assistants, sub-staff and students- were like a family. The department has provided us with quality education and extended immense support and guidance to all of us in all these years. Being a part of this department helped me start my career with a high by getting placed at MAQ Software. Engineers with a first class are common, but first class engineers are rare, and the engineers here belong to the later squad. This journey will definitely be one of the best ones I will ever have.

MAQ Software,
2016-17 passout

Being a keen observer, from my 4 years of experience in VESIT, one thing I can say with surety is that the I.T branch has always managed the be the coolest, be it our seniors, juniors or our professors.

Now that I have worked in an IT company for more than 2 years, I can look back and see VESIT as an amazing opportunity to grow tremendously as an individual by taking up responsibilities such as managing a class, a tech society, cultural fests, sports fests, or simply by participating. I have also realized that it is equally important to keep in touch with what goes on outside the college, in the IT industry.
Seek guidance. Keep learning.
