Inside this Issue

From the Professor's Desk

Don't place your mistakes on your head, their weight may crush you. Instead, pace them under your feet and use them as a platform to raise your vision.

I am glad to convey my message through our department's Newsletter Ityukta , to the staff and students of Department of Information Technology.

Dear Colleagues and Students have courage to do something new and innovative. Doing something new & innovative requires setting a defined goal. If you set a goal for yourself, you automatically get accustomed to bear the pains with a view to achieve it. If you are sincere and determined, every step that you take forward gives you a lot of satisfaction and you enjoy every bit of your action. You simply have to remain aware of the fact that life is like a roller coaster and it has its ups and downs. Do not get too much elated when you succeed in your efforts and do not get disheartened, if success eludes you at some juncture.

A quotation for all my budding technocrats :
'Life becomes more meaningful when you realize a simple fact that you'll never get the same moment twice. So enjoy every moment of life.' - Mrs. Charusheela Nehte

From the Editor's Desk

Dear VESIT colleagues and Readers,
Welcome to 8th issue of the ITYUKTA Newsletter!
Just like the gods and the asuras churned the ocean of milk to extract the nectar, we have tried to churn out the creativity from our students and faculties. This edition represents the creative side of our students to a fair degree, something that we think we all need to reconnect with. Amidst the busy schedule of a 4-month semester, we tend to lose track of all the other simpler things that we are capable of, things that we could have been proud of, that can bring one satisfaction. So we have made an attempt to bring out the talent concealed within our student and teacher community. We hope you enjoy reading this issue as much as we have enjoyed making it.

A huge thank you to our beloved alumini who have contributed in writing the wonderful and inspiring alumni voice, without which there wouldn't have been this newsletter issue.
Merry Christmas and Happy New Year!!!
Any suggestions or comments on the newsletter would be most welcome.

Congratulations

Alumini Voice

My association with VESIT was a serendipitous stroke of luck, a case of entering the wrong college as well as branch code in the admission portal.

I wanted to be an Electronics major but landed up in IT stream. Everyone feels this after completing engineering but I had this experience before Engineering even started. But that wrong branch code introduced me to a whole new world of possibilities.

VESIT helped me a lot in developing a strong technological background as well as leadership quality. The college has a number of clubs that helps in the overall development of a student, not neglecting the extracurricular activities. The faculty is very helpful and even motivated me to pursue my entrepreneurial passions. I am very thankful to the faculty of VESIT for helping me set up my own startup. I would like to mention Prof. Mr.Hardik Shah, who guided me in Electronics field.

One thing that college has taught me is that if one had passion towards something, and if one is willing to pursue it wholeheartedly, you will definitely get what you want.

I was a product manager in one of the electronic start-up (Picostone Technology) and designed a electronic product.

Currently I am a Technical Trainer, I have conducted 150+ training all across the globe, IITs , CITI bank , Abu Dhabi Police Department.

2014-15 passout

It has been 8 years since I walked out of the gates of VESIT, thinking how much I would miss it and the friends / mentors from my IT Dept. I had made during my engineering tenure. I owe a lot to the college and am thrilled to be associated with them as part of the Alumni, even after so many years. This goes to show how much the college thinks about it's students - ensuring current students benefit from the experiences of past students and providing enough opportunities to the past students to contribute back to the college. I have the same proud feeling in stating VESIT as my graduation college as the feeling I have while calling myself as the Founder of a startup IT firm Atto Infotech LLP.

I believe whatever happens, happens for the best - and I couldn't have got a better college and better faculties than this or couldn't have carved out my professional career in any other better way. This is my advise to all students - "Don't think too far ahead; be honest and give your best in whatever you do ,results will take care of themselves."
