

Name of the Organization: Chembur Fire Station

BRIDGING THE GAP BETWEEN YOU & FIREFIGHTERS – FASTER RESPONSE, SAFER COMMUNITIES.

Fire emergencies demand precision, speed, and coordination. AIFA (AI-Driven Firefighter Assistant) is a smart, AI-powered web dashboard designed to empower firefighters with seamless incident logging, equipment readiness tracking, and drill documentation—ensuring preparedness like never before.

By aligning with SDG 8 (Decent Work & Economic Growth) and SDG 11 (Sustainable Cities & Communities), AIFA transforms fire department operations with structured data-driven decision-making and enhanced safety awareness, making cities safer, smarter, and more resilient.

Group no. 11

Domain: Application Design and Product Development

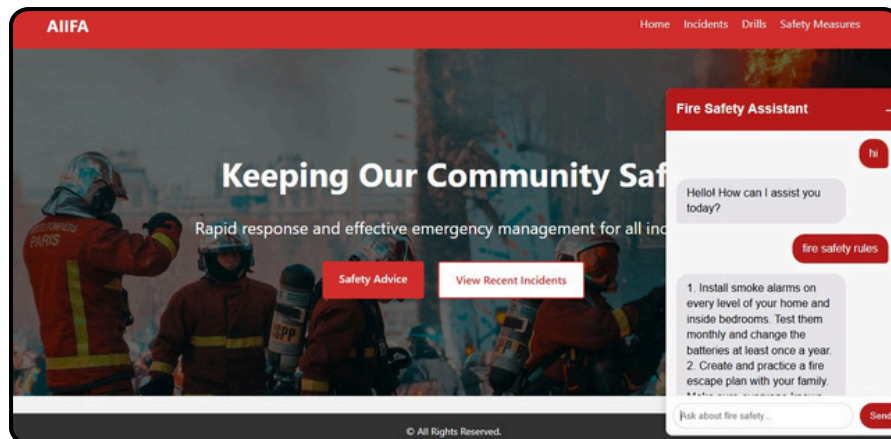

Team Members Name

1. Neha Mankani
2. Jai Bhatia
3. Shraddha Bhagwat
4. Rochelle Ann Teddy

Mentor
Mrs. Indu Dokare
