## SINGLE PARENTING

Single parenting comes with financial, emotional, and legal challenges, making it difficult for parents to provide stability and support for their children. Many struggle with financial insecurity, limited job opportunities, and a lack of affordable childcare, leading to stress and mental health concerns. Social stigma and isolation further add to their burden, while navigating legal issues like custody and government aid can be overwhelming. Our project aims to bridge these gaps by developing a digital support platform that offers financial aid resources, mental health counseling, legal guidance, job opportunities, and a community network. By providing accessible and reliable support, we strive to empower single parents and help them build a stable and fulfilling future for themselves and their children.

### Domain - Application Design and Product Development

Check out our Initiatives page and see how your Donation can make a difference. Every dollar helps a Single Parent in need. If we can support families, we can ensure the success of our children and a better future for so many. It only takes an interest to truly impact someone's life.
