INNOVATIVE SUSTAINABLE DEVELOPMENT THROUGH FIELD PROJECTS ACADEMIC YEAR 2024-25

DEPARTMENT OF COMPUTER ENGINEERING

Name of the Organization: Blessings Children Home

BRIGHTER TOMMOROWS

Children in orphanages often face significant challenges in accessing shelter, education, and essential resources, limiting their growth and future opportunities. Despite various social welfare programs, the lack of targeted platforms for support continues to hinder their development. Our project, Blessings Children Home, addresses this issue by creating a tech-driven website designed to provide shelter resources, educational support, and skill development opportunities for orphaned children. The website also tackles the challenge of insufficient donations by incorporating a donation page, allowing people to contribute directly to the orphanage's needs. This initiative aligns with SDG 1: No Poverty, by promoting financial independence through skill training and empowerment, and SDG 2: Zero Hunger, by facilitating access to food and nutrition programs, ensuring that no child is left behind in their journey toward a better future.
